
Read PDF Basic Income And How We Can Make It Happen Pelican Introductions

Thank you very much for downloading **Basic Income And How We Can Make It Happen Pelican Introductions**. Maybe you have knowledge that, people have see numerous times for their favorite books bearing in mind this Basic Income And How We Can Make It Happen Pelican Introductions, but end occurring in harmful downloads.

Rather than enjoying a fine PDF behind a mug of coffee in the afternoon, on the other hand they juggled afterward some harmful virus inside their computer. **Basic Income And How We Can Make It Happen Pelican Introductions** is affable in our digital library an online permission to it is set as public appropriately you can download it instantly. Our digital library saves in combined countries, allowing you to acquire the most less latency time to download any of our books in imitation of this one. Merely said, the Basic Income And How We Can Make It Happen Pelican Introductions is universally compatible like any devices to read.

KEY=INTRODUCTIONS - KELLEY MAYRA

BASIC INCOME

Pelican Publishing Company 'Basic Income is an idea whose time has come, and Guy Standing has pioneered our understanding of it... Standing's analysis is vital' Paul Mason Shouldn't everyone receive a stake in society's wealth? Could we create a fairer world by granting a guaranteed income to all? What would this mean for our health, wealth and happiness? Basic Income is a regular cash transfer from the state, received by all individual citizens. It is an acknowledgement that everyone plays a part in generating the wealth currently enjoyed only by a few. Political parties across the world are now adopting it as official policy and the idea generates headlines every day. Guy Standing has been at the forefront of thought about Basic Income for the past thirty years, and in this book he covers in authoritative detail its effects on the economy, poverty, work and labour; dissects and disproves the standard arguments against Basic Income; explains what we can learn from pilots across the world and illustrates exactly why a Basic Income has now become such an urgent necessity.

BASIC INCOME

A GUIDE FOR THE OPEN-MINDED

Yale University Press Shouldn't everyone receive a stake in society's wealth? Could we create a fairer world by guaranteeing income to all? What would this mean for our health, wealth, and happiness? Basic income is a revolutionary idea that guarantees regular, unconditional cash transfers from the government to all citizens. It is an acknowledgement that everyone plays a part in generating the wealth currently enjoyed by only a few and would rectify the recent breakdown in income distribution. Political parties across the world are now adopting this innovative policy and the idea generates headlines every day. Guy Standing has been at the forefront of thought surrounding basic income for the past thirty years, and in this book he covers in authoritative detail its effects on the economy, poverty, work, and labor; dissects and disproves the standard arguments against basic income; explains what we can learn from pilots across the world; and illustrates exactly why basic income has now become such an urgent necessity.

EXPLORING UNIVERSAL BASIC INCOME

A GUIDE TO NAVIGATING CONCEPTS, EVIDENCE, AND PRACTICES

World Bank Publications Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro-tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.

BASIC INCOME

A GUIDE FOR THE OPEN-MINDED

Yale University Press **Shouldn't everyone receive a stake in society's wealth? Could we create a fairer world by guaranteeing income to all? What would this mean for our health, wealth, and happiness? Basic income is a revolutionary idea that guarantees regular, unconditional cash transfers from the government to all citizens. It is an acknowledgement that everyone plays a part in generating the wealth currently enjoyed by only a few and would rectify the recent breakdown in income distribution. Political parties across the world are now adopting this innovative policy and the idea generates headlines every day. GIVE PEOPLE MONEY

HOW A UNIVERSAL BASIC INCOME WOULD END POVERTY, REVOLUTIONIZE WORK, AND REMAKE THE WORLD

Crown **A brilliantly reported, global look at universal basic income—a stipend given to every citizen—and why it might be the answer for our age of rising inequality, persistent poverty, and dazzling technology. Imagine if every month the government deposited \$1,000 into your checking account, with no strings attached and nothing expected in return. It sounds crazy. But it has become one of the most influential and discussed policy ideas of our time. The founder of Facebook, President Obama's chief economist, Canada and Finland's governments, the conservative and labor movements' leading intellectual lights—all are seriously debating versions of a UBI. In this sparkling and provocative book, economics writer Annie Lowrey looks at the global UBI movement. She travels to Kenya to see how a UBI is lifting the poorest people on earth out of destitution, India to see how inefficient government programs are failing the poor, South Korea to interrogate UBI's intellectual pedigree, and Silicon Valley to meet the tech titans financing UBI pilots in expectation of a world with advanced artificial intelligence and little need for human labor. Lowrey also examines the challenges the movement faces: contradictory aims, uncomfortable costs, and most powerfully, the entrenched belief that no one should get something for nothing. The UBI movement calls into question our deepest intuitions about what we owe each other. Yet as Lowrey persuasively shows, a UBI—giving people money—is not just a solution to our problems, but a better foundation for our society in this age of marvels.**

BASIC INCOME

A RADICAL PROPOSAL FOR A FREE SOCIETY AND A SANE ECONOMY

Harvard University Press **Providing a basic income to everyone, rich or poor, active or inactive, was advocated by Paine, Mill, and Galbraith but the idea was never taken seriously. Today, with the welfare state creaking, it is one of the world's most widely debated proposals. Philippe Van Parijs and Yannick Vanderborght present a comprehensive defense of this radical idea.**

THE CASE FOR UNIVERSAL BASIC INCOME

John Wiley & Sons **Advocated (and attacked) by commentators across the political spectrum, paying every citizen a basic income regardless of their circumstances sounds utopian. However, as our economies are transformed and welfare states feel the strain, it has become a hotly debated issue. In this compelling book, Louise Haagh, one of the world's leading experts on basic income, argues that Universal Basic Income is essential to freedom, human development and democracy in the twenty-first century. She shows that, far from being a silver bullet that will transform or replace capitalism, or a sticking plaster that will extend it, it is a crucial element in a much broader task of constructing a democratic society that will promote social equality and humanist justice. She uses her unrivalled knowledge of the existing research to unearth key issues in design and implementation in a range of different contexts across the globe, highlighting the potential and pitfalls at a time of crisis in governing and public austerity. This book will be essential reading for anyone who wants to get beyond the hype and properly understand one of the most important issues facing politics, economics and social policy today.**

BASIC INCOME

A TRANSFORMATIVE POLICY FOR INDIA

[Bloomsbury Publishing](#) This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Would it be possible to provide people with a basic income as a right? The idea has a long history. This book draws on two pilot schemes conducted in the Indian State of Madhya Pradesh, in which thousands of men, women and children were provided with an unconditional monthly cash payment. In a context in which the Indian government at national and state levels spends a vast amount on subsidies and selective schemes that are chronically expensive, inefficient, inequitable and subject to extensive corruption, there is scope for switching at least some of the spending to a modest basic income. This book explores what would be likely to happen if this were done. The book draws on a series of evaluation surveys conducted over the course of the eighteen months in which the main pilot was in operation, supplemented with detailed case studies of individuals and families. It looks at the impact on health and nutrition, on schooling, on economic activity, women's agency and the welfare of those with disabilities. Above all, the book considers whether or not a basic income could be transformative, in not only improving individual and family welfare but in promoting economic growth and development, as well as having an emancipatory effect for people long mired in conditions of poverty and economic insecurity.

UNIVERSAL BASIC INCOME IN HISTORICAL PERSPECTIVE

[Springer Nature](#) This new edited collection brings together historians and social scientists to engage with the global history of Universal Basic Income (UBI) and offer historically-rich perspectives on contemporary debates about the future of work. In particular, the book goes beyond a genealogy of a seemingly utopian idea to explore how the meaning and reception of basic income proposals has changed over time. The study of UBI provides a prism through which we can understand how different intellectual traditions, political agents, and policy problems have opened up space for new thinking about work and welfare at critical moments. Contributions range broadly across time and space, from Milton Friedman and the debate over guaranteed income in the post-war United States to the emergence of the European basic income movement in the 1980s and the politics of cash transfers in contemporary South Africa. Taken together, these chapters address comparative questions: why do proposals for a guaranteed minimum income emerge at some times and recede into the background in others? What kinds of problems is basic income designed to solve, and how have policy proposals been shaped by changing attitudes to gender roles and the boundaries of social citizenship? What role have transnational networks played in carrying UBI proposals between the global north and the global south, and how does the politics of basic income vary between these contexts? In short, the book builds on a growing body of scholarship on UBI and lays the groundwork for a much richer understanding of the history of this radical proposal. Chapter 3 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

BASIC INCOME GUARANTEE

YOUR RIGHT TO ECONOMIC SECURITY

[Springer](#) A Basic Income Guarantee (BIG) is the unconditional government-ensured guarantee that all citizens will have enough income to meet their basic needs without a work requirement. Significant questions include: Why should we adopt a BIG? Can the U.S. afford it? Why don't the current welfare programs work? Why not guarantee everyone a job? Would anyone work if his or her income were guaranteed? Has a BIG ever been tested? This book answers these questions and many more in simple, easy-to-understand language.

FINANCING BASIC INCOME

ADDRESSING THE COST OBJECTION

[Springer](#) This Palgrave Pivot argues that basic income at a decent level is, in fact, affordable. The contributors approach the topic from the perspectives of three different countries—Canada, Switzerland, and Australia—to overcome objections that a universal program to keep all citizens above the poverty line would be too expensive to implement. They assess the complex array of revenue sources that can make universal basic income feasible, from the underestimated value of public program redundancies to new and so far unaccounted publicly owned assets.

RAISING THE FLOOR

HOW A UNIVERSAL BASIC INCOME CAN RENEW OUR ECONOMY AND REBUILD THE AMERICAN DREAM

[PublicAffairs](#) Advances in technology are creating the next economy and enabling us to make things/do things/connect with others in smarter, cheaper, faster, more effective ways. But the price of this progress has been a decoupling of the engine of prosperity from jobs that have been the means by which people have ascended to (and stayed in) the middle class. Andy Stern, the former president of the Service Employees International Union (SEIU) spent four years traveling the country and asking economists, futurists, labor leaders, CEOs, investment bankers, entrepreneurs, and political leaders to help picture the U.S. economy 25 to 30 years from now. He vividly reports on people who are analyzing and creating this new economy--such as investment banker Steve Berkenfeld; David Cote, the CEO of Honeywell International; Andy Grove of Intel; Carl Camden, the CEO of Kelly Services; and Geoffrey Canada of the Harlem Children's Zone. Through these stories, we come to a stark and deeper understanding of the toll technological progress will continue to take on jobs and income and its inevitable effect on tens of millions of people. But there is hope for our economy and future. The foundation of economic prosperity for all Americans, Stern believes, is a universal basic income. The idea of a universal basic income for all Americans is controversial but American attitudes are shifting. Stern has been a game changer throughout his career, and his next goal is to create a movement that will force the political establishment to take action against something that many on both the right and the left believe is inevitable. Stern's plan is bold, idealistic, and challenging--and its time has come.

BASIC INCOME

THE MATERIAL CONDITIONS OF FREEDOM

[Pluto Press](#) Basic Income is a policy idea that could help us revolutionise the way we organise society. This book is the first proper guide to basic income -- what it is, how we can organise it, and how it can benefit the majority in different spheres of their lives. Basic Income is simply the idea that everyone in a given society has a right to a minimal income. This is paid by the state out of taxation. Set at a subsistence level, it would take the place of unemployment and other benefits. This would bring profound social changes. Anyone could opt out of employment at any time. Those with few skills would no longer be forced to take up jobs with poor prospects, and employers offering McJobs would be forced to offer better terms. And money wasted by the state in means testing and tracing benefit fraud is saved. The campaign in favour of basic income is growing and governments are beginning to take notice. This is a clear, concise guide to the principles and practicalities of this revolutionary idea.

A SHARING ECONOMY

HOW SOCIAL WEALTH FUNDS CAN REDUCE INEQUALITY AND HELP BALANCE THE BOOKS

[Policy Press](#) Britain is a society increasingly divided between the super-affluent and the impoverished. A Sharing Economy proposes radical new ways to close the growing income gap and spread social opportunities. Drawing on overseas examples, Stewart Lansley argues that mobilising the huge financial potential of Britain's public assets could pay for a pioneering new social wealth fund. Such a fund would boost economic and social investment, and, by building the social asset base, simultaneously strengthen the public finances. A powerful new policy tool, such funds would ensure that more of the gains from economic activity are shared by all and not colonised by a powerful few. This is a vital new contribution to the pressing debate on how to reduce inequality and combat austerity.

BASIC INCOME EXPERIMENTS

A CRITICAL EXAMINATION OF THEIR GOALS, CONTEXTS, AND METHODS

[Springer Nature](#) This book brings together insights and reflections following a set of interviews conducted with the main stakeholders involved in past, current, and future basic income experiments. It provides an analysis of some of the major elements and factors influencing experiments, as well of some of their most important outputs understood as results of their own experimental design, their sociological and political basis, and the epistemological status of their results. By pursuing a bottom-up strategy, where the interviews conducted take a pivotal role in the collection and analysis phase of the book, this book gathers key questions relating to policy experiments. Some questions reflected

upon include the general idea of why one should engage and implement a basic income experiment, and the paradox consisting in the fact that most basic income experiments fall short of being closely considered “pure” basic income schemes. In facing the question and the paradox head-on, the book assesses questions of experimental design, the political and social context surrounding the policy, and the main results and what can they tell us about basic income.

BASIC INCOME FOR CANADIANS

FROM THE COVID-19 EMERGENCY TO FINANCIAL SECURITY FOR ALL

[James Lorimer & Company](#) Before the COVID-19 pandemic, the idea of providing a basic income to everyone in Canada who needs it was already gaining broad support. Then, in response to a crisis that threatened to put millions out of work, the federal government implemented new measures which constituted Canada's largest ever experiment with a basic income for almost everyone. In this new and revised edition, Evelyn L. Forget offers a clear-eyed look at how these emergency measures could be transformed into a program that ensures an adequate basic income for every Canadian. Forget details what we can learn from earlier basic income experiments in Canada and internationally. She weighs the options, investigates whether Canadians can afford a permanent basic income program and describes how it could best be implemented across the country. This accessible book offers everything a reader needs to decide if a basic income program is the right follow-up to the short-term government response to COVID-19.

A CRITICAL ANALYSIS OF BASIC INCOME EXPERIMENTS FOR RESEARCHERS, POLICYMAKERS, AND CITIZENS

[Springer](#) At least six different Universal Basic Income (UBI) experiments are underway or planned right now in the United States, Canada, the United Kingdom, Finland, and Kenya. Several more countries are considering conducting experiments. Yet, there seems to be more interest simply in having UBI experiments than in exactly what we want to learn from them. Although experiments can produce a lot of relevant data about UBI, they are crucially limited in their ability to enlighten our understanding of the big questions that bear on the discussion of whether to implement UBI as a national or regional policy. And, past experience shows that results of UBI experiments are particularly vulnerable to misunderstanding, sensationalism, and spin. This book examines the difficulties of conducting a UBI experiment and reporting the results in ways that successfully improve public understanding of the probable effects of a national UBI. The book makes recommendations how researchers, reporters, citizens, and policymakers can avoid these problems and get the most out of UBI experiments.

PLUNDER OF THE COMMONS

A MANIFESTO FOR SHARING PUBLIC WEALTH

[Penguin UK](#) 'One of the most important books I've read in years' Brian Eno We are losing the commons. Austerity and neoliberal policies have depleted our shared wealth; our national utilities have been sold off to foreign conglomerates, social housing is almost non-existent, our parks are cordoned off for private events and our national art galleries are sponsored by banks and oil companies. This plunder deprives us all of our common rights, recognized as far back as the Magna Carta and the Charter of the Forest of 1217, to share fairly and equitably in our public wealth. Guy Standing leads us through a new appraisal of the commons, stemming from the medieval concept of common land reserved in ancient law from marauding barons, to his modern reappraisal of the resources we all hold in common - a brilliant new synthesis that crystallises quite how much public wealth has been redirected to the 1% in recent decades through the state-approved exploitation of everything from our land to our state housing, health and benefit systems, to our justice system, schools, newspapers and even the air we breathe. Plunder of the Commons proposes a charter for a new form of commoning, of remembering, guarding and sharing that which belongs to us all, to slash inequality and soothe our current political instability.

TAX, INEQUALITY, AND HUMAN RIGHTS

[Oxford University Press](#) For the first time, *Human Rights and Tax in an Unequal World* brings together works by human rights and tax law experts, to illustrate the linkages between the two fields and to reveal their mutual relevance in tackling economic, social, and political inequalities. Against the backdrop of systemic corporate tax avoidance, the widespread use of tax havens, persistent pressures to embrace austerity policies, and growing gaps between the rich and poor, this book encourages readers to understand fiscal policy as human rights policy, with profound consequences for the wellbeing of citizens around the world. The essays collected examine where the foundational principles of tax law and human rights law intersect and diverge; discuss the cross-border nature and human rights impacts of abusive practices like tax avoidance and evasion; question the role of states in

bringing transparency and accountability to tax policies and practices; highlight the responsibility of private sector actors for the consequences of tax laws; and critically evaluate certain domestic tax rules through the lens of equality and non-discrimination. The contributing scholars and practitioners explore how an international human rights framework can anchor debates around international tax reform and domestic fiscal consolidation in existing state obligations. They address what human rights law requires of state tax policies, and what a state's tax laws and loopholes mean for the enjoyment of human rights within and outside its borders. Ultimately, tax and human rights both turn on the relationship between the individual and the state, and thus both fields face crises as the social contract frays and populist, illiberal regimes are on the rise.

THE WAR ON NORMAL PEOPLE

THE TRUTH ABOUT AMERICA'S DISAPPEARING JOBS AND WHY UNIVERSAL BASIC INCOME IS OUR FUTURE

Hachette Books From 2020 Democratic presidential candidate Andrew Yang, a captivating account of how "a skinny Asian kid from upstate" became a successful entrepreneur, only to find a new mission: calling attention to the urgent steps America must take, including Universal Basic Income, to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income-and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls "human capitalism."

IN OUR HANDS

A PLAN TO REPLACE THE WELFARE STATE

Rowman & Littlefield Imagine that the United States were to scrap all its income transfer programs—including Social Security, Medicare, and all forms of welfare—and give every American age twenty-one and older \$10,000 a year for life. This is the Plan, a radical new approach to social policy that defies any partisan label. First laid out by Charles Murray a decade ago, the updated edition reflects economic developments since that time. Murray, whose previous books include *Losing Ground* and *The Bell Curve*, demonstrates that the Plan is financially feasible and uses detailed analysis to argue that many goals of the welfare state—elimination of poverty, comfortable retirement for everyone, universal access to healthcare—would be better served under the Plan than under the current system. Murray's goal, shared by Left and Right, is a society in which everyone, including the unluckiest among us, has the opportunity and means to construct a satisfying life. *In Our Hands* offers a rich and startling new way to think about how that goal might be achieved.

BATTLING EIGHT GIANTS

BASIC INCOME NOW

Bloomsbury Publishing Today in one of the richest countries in the world, 60% of households in poverty have people in jobs, inequality is the highest it has been for 100 years, climate change threatens our extinction and automation means millions are forced into a life of precarity. The solution? Basic Income. Here, Guy Standing, the leading expert on the concept, explains how to solve the new eight evils of modern life, and all for almost zero net cost. There is a better future, one that makes certain all citizens can share in the wealth of the modern economy. Far from being a new idea, Standing shows how the roots of basic income go back to the Charter of the Forest, one of two foundational documents of the state - the other, sealed on the same day, being the Magna Carta. All citizens have a right to the wealth created by capitalism, and all - left or right, rich or poor - can benefit from a dynamic and ecologically grounded economy created by the guarantee of subsistence to all.

THE CASE FOR BASIC INCOME

FREEDOM, SECURITY, JUSTICE

[Between the Lines](#) Inequality is up. Decent work is down. Free market fundamentalism has been exposed as a tragic failure. In a job market upended by COVID-19—with Canadians caught in the grip of precarious labour, stagnant wages, a climate crisis, and the steady creep of automation—an ever-louder chorus of voices calls for a liveable and obligation-free basic income. Could a basic income guarantee be the way forward to democratize security and intervene where the market economy and social programs fail? Jamie Swift and Elaine Power scrutinize the politics and the potential behind a radical proposal in a post-pandemic world: that wealth should be built by a society, not individuals. And that we all have an unconditional right to a fair share. In these pages, Swift and Power bring to the forefront the deeply personal stories of Canadians who participated in the 2017-2019 Ontario Basic Income Pilot; examine the essential literature and history behind the movement; and answer basic income's critics from both the right and left.

UTOPIA FOR REALISTS

HOW WE CAN BUILD THE IDEAL WORLD

[Little, Brown](#) Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." --New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way-and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. Utopia for Realists is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization—from the end of slavery to the beginning of democracy—was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

BASIC INCOME WORLDWIDE

HORIZONS OF REFORM

[Springer](#) In the midst of growing criticism of current economic orthodoxies and welfare systems, basic income is growing in popularity. This is the first book to discuss existing at examples of basic income, in both rich and poor countries, and to consider its prospects in other places around the world.

BASIC INCOME AND SOVEREIGN MONEY

THE ALTERNATIVE TO ECONOMIC CRISIS AND AUSTERITY POLICY

[Springer Nature](#) "This is a radical, thought-provoking book, which brings together debates that are often kept separate about basic income and 'sovereign money'. You might not agree with all of it, but it makes big arguments and does so with constructive intent: that of proposing alternative ways of organising our economy and welfare states." Nick Pearce, Director of The Institute for Policy Research, University of Bath, UK "Though I have criticized modern money theory (MMT) for being too facile regarding the consequences of money financed deficits, I welcome this book's advocacy of a universal basic income. MMT proponents have focused on the problem of employment. Geoff Crocker wants to shift the focus to basic income, and I believe he is right. We are in an era of transition. Employment was the fundamental problem of the 20th century. Income distribution will be the fundamental problem of the 21st century. We must begin transitioning the policy discourse now. In coming decades we will need both employment and basic income policy. It is good to have MMT advocates on board." Thomas Palley, independent economist, Washington, DC, USA "Geoff Crocker's book is a very stimulating and provoking contribution to the discussion of

how to define, identify, and finance basic income. It addresses very clearly the societal issue of a monetary basic income funding which will excite the discussion beside well --known tax proposals, and establishes the discussion on integrating basic income directly into crisis prevention and crisis solution." Bernhard Neumärker, Götz Werner Professor of Economic Policy & Constitutional Economic Theory and Head of Freiburg Institute for Basic Income Studies (FRIBIS) at the University of Freiburg The current economic system is dysfunctional, characterised by crises, austerity, excessive household and government debt, low pay, poverty, inequality, and ecological damage. This needs a radical re-think and re-engineering of the economic system. The standard explanation of the 2007 economic crisis is that banks behaved badly and governments failed to regulate. But policies of tighter bank regulation, quantitative easing, and austerity failed, and proved counter-productive. This book challenges this orthodox view. From a careful analysis of long-term economic data, it shows that earned income has inexorably fallen behind economic output, leading to huge increases in consumer debt, causing the crisis. Governments have sought to curtail deficit spending by socially harmful austerity policy. The answer is a universal basic income, funded by debt-free sovereign money, which also funds government social expenditure, always limited by economic output to avoid inflation. This book will appeal to policy makers, academic economists, think tank networks, and everyone who is concerned with the ongoing dysfunctionality of the current economic system.

THE PALGRAVE INTERNATIONAL HANDBOOK OF BASIC INCOME

Springer Nature "This Handbook offers a timely 'snapshot' of the fast-moving global debates on Basic Income. Embracing a range of ideological, ethical, historical and cross-national perspectives, it looks at the case for Basic Income through both a focused and a wide-angled lens. Rather than asserting hard and fast conclusions, it ends with the valuable message that context is all." —Ruth Lister, Loughborough University, UK "A must-read Handbook that provides solid foundations for the growing number of researchers, policymakers and campaigners involved in the ongoing debate on Basic Income." —Rubén M. Lo Vuolo, the Interdisciplinary Centre for the Study of Public Policy, Argentina "A comprehensive, competent, accessible, up-to-date picture of the current state of knowledge and debate on basic income in several disciplines and in many countries." —Philippe Van Parijs, the University of Louvain, Belgium A Basic Income is an unconditional regular payment for every individual. But is it desirable? And is it feasible? This Handbook brings together scholars from various disciplines and from around the world to examine the history, characteristics, effects, viability and implementation of Basic Income. A variety of pilot projects and ideological perspectives are considered in depth.

THE ABSOLVED

Black Spot Books It's 2036. Henri is a wealthy physician, husband, father, and serial philanderer. He is also one of the relatively few people to still have a job. Automation and other technological advances have led to unemployment so severe that many people are no longer expected to work and are now known as The Absolved. Meanwhile, it's election season, and a candidate from a radical fringe party called the Luddites is calling for an end to the Divine Rights of Machines. After Henri is displaced from his job, two Luddite sympathizers—whom Henri has befriended at his local bar—frame him for an anti-technology terrorist act. The prospect of Henri's salvation comes at the cost of foregoing his guiding principles in life. This new vision for the world, after all, just might prove better than the technological advancements that, paradoxically, have left humanity out in the cold.

FAIR SHOT

RETHINKING INEQUALITY AND HOW WE EARN

Introduction -- How it happens -- The dismantling of the American dream -- Africa & back -- The precariat -- A guaranteed income for working people -- Worthwhile work -- Untethered idealism -- Everybody likes a tax credit -- What we owe one another -- Afterword

ESSENTIALS OF BASIC INCOME

This innovative book provides a new, concise perspective on Basic Income - a regular, unconditional payment to every citizen resident in the country. This book has been rigourously researched and thus will appeal to academics and policy-makers, as well, as to the general reader who is concerned about the current state of social security in the UK.

UTOPIA FOR REALISTS

HOW WE CAN BUILD THE IDEAL WORLD

[Little, Brown](#) From one of Europe's leading young thinkers, a brief history of utopia and a pragmatic manifesto for how to improve the lives of the 99 percent today A majority of Americans report that they would take two extra weeks of vacation above two extra weeks of salary, half of all business professionals say that their work offers no meaning or significance, and nearly half of all American jobs are at a high risk of being usurped by machines. Meanwhile, after working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way-and in some places it isn't. This guide to a revolutionary yet achievable utopia offers three core ideas-a universal basic income, a fifteen-hour workweek, and open borders across the globe-each of them supported by lively anecdotes, multiple studies, and numerous success stories. Utopia for Realists is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Utopia for Realists offers the encouraging news that we really can reconstruct society with a visionary approach that is wholly implementable. Every progressive milestone of civilization-from the end of slavery to the beginning of democracy-was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

THE COMING AGE OF IMAGINATION

HOW UNIVERSAL BASIC INCOME WILL LEAD TO AN EXPLOSION OF CREATIVITY

[Unbound Publishing](#) Every adult paid a living wage. No strings attached. Universal basic income is a very old idea that is fast becoming the radical idea of the twenty-first century. It could eradicate poverty and avoid a much-predicted dystopian future of automation and high unemployment - but it could also have an unexpected effect: an explosion of mass creativity. Phil Teer draws insights from the creative and entrepreneurial effects of basic income experiments and weaves them into stories of how the Romantic poets invented consumerism; artists regenerated cities like New York, Glasgow and Berlin; and creative geniuses like David Bowie, Bob Dylan, Kurt Vonnegut, Haruki Murakami and many others liberated their creative spirits and transformed their lives. The Coming Age of Imagination is a creative manifesto for universal basic income. When we no longer have to worry about money, we have the opportunity to be creative on a mass scale. Simply put, basic income changes everything.

UNIVERSAL BASIC INCOME

[Routledge](#) Universal basic income is a controversial policy which is causing a stir amongst academics, politicians, journalists and policy-makers all over the world. The idea of receiving 'money for nothing', with no strings attached, has for a long time appeared a crazy or radical proposal. But today, this policy is being put into practice. With more and more trials and experiments taking place in different countries, this book provides both the theory and context for making sense of different basic income approaches, examining how the policy can be best implemented. Unlike many other texts written on this topic, the book provides a balanced account of basic income, weighing up the pros and cons from a number of different positions. The book provides a theory chapter, enabling readers to grasp some of the complex philosophical ideas and concepts which underpin universal basic income, such as social justice, equality and freedom. It also provides an examples chapter, which examines both historical and contemporary basic income studies to have taken place from around the globe. The book also features chapters on the environment and the work of women, as well as an 'against' universal basic income chapter, which specifically draws on the criticisms of the policy. This volume is an essential resource for anyone who wishes to get to grips with universal basic income.

A BASIC INCOME HANDBOOK

[Luath Press Ltd](#) In this informative book, Annie Miller does not only explore the idea of basic income: she exhaustively explains what it is and what it would mean to implement, using extensive economic data. Miller starts off from a broad, existential position, outlining why the current system is no longer suitable for the times and needs to change. Her proposed solution is a society with BI, which she first outlines abstractly before diving into its internal workings, explaining who would be eligible for BI, what would happen to the rest of the welfare system, and other crucial details. Miller backs up her statements with substantive economic research and analysis. She ends with a section on how to achieve a society with BI, giving examples of pilot schemes elsewhere and discussing the politics behind implementation. Thus she brings the reader full circle from aspiring to a BI society, to seeing what it would take to reach it.

EMPIRICAL RESEARCH ON AN UNCONDITIONAL BASIC INCOME IN EUROPE

[Springer Nature](#) The unconditional basic income (UBI) has attracted renewed attention in academia, as well as in public discussions in recent years, and much has been written on the possible consequences of a UBI. However, this is the first book focusing on the UBI in Europe that offers empirical research findings. It includes a survey on preferences for a UBI in the EU; an assessment of the political feasibility of a UBI in the EU; field studies in the Netherlands and Scotland; and the findings of laboratory experiments. Presenting contributions from Dutch and international researchers, this book provides scientific answers to the question of whether a UBI is desirable and feasible in Europe.

A PRECARIAT CHARTER

FROM DENIZENS TO CITIZENS

[A&C Black](#) This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Guy Standing's immensely influential 2011 book introduced the Precariat as an emerging mass class, characterized by inequality and insecurity. Standing outlined the increasingly global nature of the Precariat as a social phenomenon, especially in the light of the social unrest characterized by the Occupy movements. He outlined the political risks they might pose, and at what might be done to diminish inequality and allow such workers to find a more stable labour identity. His concept and his conclusions have been widely taken up by thinkers from Noam Chomsky to Zygmunt Bauman, by political activists and by policy-makers. This new book takes the debate a stage further, looking in more detail at the kind of progressive politics that might form the vision of a Good Society in which such inequality, and the instability it produces, is reduced. A Precariat Charter discusses how rights - political, civil, social and economic - have been denied to the Precariat, and argues for the importance of redefining our social contract around notions of associational freedom, agency and the commons.

THE ETHICS AND ECONOMICS OF THE BASIC INCOME GUARANTEE

[Routledge](#) Governments in the US, the UK and other nations around the world routinely consider and, in some cases, experiment with reforms of their income support systems. The basic income guarantee, a universal unconditional income grant, has received increasing attention from scholars as an alternative to the kinds of reforms that have been implemented. This book explores the political, sociological, economic, and philosophical issues of the basic income guarantee. Tracing the history of the idea, from its origins in the late eighteenth century through its political vogue in the 1970s, when the Family Assistance Plan narrowly missed passage in the US Congress, it also examines the philosophical debate over the issue. The book is designed to foster a climate of ideas amongst those specifically interested in the income support policies and more widely for those concerned with public, welfare and labour economics. Its coverage will enable readers to obtain an in depth grounding in the topic, regardless of their position in the debate.

UNIVERSAL BASIC INCOME: DEBATE AND IMPACT ASSESSMENT

[International Monetary Fund](#) This paper discusses the definition and modelling of a universal basic income (UBI). After clarifying the debate about what a UBI is and presenting the arguments in favor and against, an analytical approach for its assessment is proposed. The adoption of a UBI as a policy tool is discussed with regard to the policy objectives (shaped by social preferences) it is designed to achieve. Key design dimensions to be considered include: coverage, generosity of the program, overall progressivity of the policy, and its financing.

THE DOCTOR'S KITCHEN

[HarperThorsons](#) 'I'm just a straight-talking NHS doctor lending my unbiased opinion on healthy eating and showing everybody how to get phenomenal ingredients on their plates everyday.' Dr Rupy Aujla's first cookbook, The Doctor's Kitchen, is the go-to book to help you kick unhealthy faddy diets for good. In the book, Rupy, explains the principles of healthy living in a fun and relatable way with over 100 vibrant, tasty recipes steeped in medical science which are easy and inexpensive to make. The impact of lifestyle on illness has never been higher on the national agenda and Rupy believes that what we choose to put on our plates is the most important health intervention we can make. The Doctor's Kitchen stands out from the crowd by using medical knowledge to create the recipes. Rupy advocates Plates over Pills every time and he is living proof that what you eat can shift medical outcomes as he overhauled his own heart condition by addressing his diet and creating his own delicious food that he now shares in this book. Infused with flavours from around the world, this tasty selection of everyday meals makes healthy eating an absolute pleasure.

BASIC INCOME GUARANTEE AND POLITICS

INTERNATIONAL EXPERIENCES AND PERSPECTIVES ON THE VIABILITY OF INCOME GUARANTEE

Palgrave Macmillan **This exciting and timely collection brings together international and national scholars and advocates to provide historical overviews of efforts to pass basic income guarantee legislation in their respective countries and/or across regions of the globe. Contributing authors address specific substantive issues such as: who were the main people and groups involved in support of or against such legislative efforts; what were the main reasons for the success or failure of BIG-related initiatives to date; and what the prospects are for the future. Countries discussed include Australia, Finland, Germany, Iran, Japan, Mexico, Netherlands, Spain, the UK, and the US.**
