NATURAL RESOURCES, NEITHER CURSE NOR DESTINY

World Bank Publications 'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.

BOSCH

HIERONYMUS BOSCH AND THE LISBON TEMPTATION : A VIEW FROM THE 3RD MILLENNIUM

Hiëronymus Bosch was painting frightful yet vaguely likable monsters long before computer games were ever invented, often with a touch of humor. His works are assertive statements about the mental illness that befalls any man who abandons the teachings of Christ. With a life that spanned 1450 to 1516, Bosch experienced the thick of the highly charged Renaissance and its wars of religion. Medieval tradition and values were crumbling, paving the way to thrust man into a new universe where faith lost some of its power and much of its magic. Bosch set out to warn doubters of the perils awaiting all.

CRUCIBLE

Daniel Bosch *Crucible* is a collection of poems by award-winning poet Daniel Bosch. The poems break easily into two sections. In the first, a set of ironic, emulative "Homages & Elegies," Bosch playfully apostrophizes poets living and dead, as if it took two not only to tango, but to write a poem. He wrestles with Dickinson, grooves with the glacial wit of Frost (belatedly), waltzes with Walcott's ghost (prematurely), mimics Mandelstam, picks apples with Sappho, and shares a transcontinental flight with Brodsky. Each poem is carefully measured; some are composed by meticulous inversion of their precursor's poetic strategy. Literary but by no means prudish, these poems look back-and forward-to a time when poems took stands readers could understand, disagree with, and laugh at. The result is a sort of hypertext essay on what it means to pour oneself into the mold of "poet" in the late twentieth and early twenty-first centuries. The second half of *Crucible* is "Passion Fruit," a fourteen-poem "sonnet" that courts a single muse through incarnations as various as "Orange," "Peach," "Banana," "Cherries," "Blueberries," and "Mango." Part love poem, part meditation on physical longing and memory, "Passion Fruit" celebrates the eye's brief glimpses of beauty in poems frank, funny, and joyful. "I admire Daniel Bosch's *Crucible* very much for its inventiveness and vitality and the enviable skill of its execution. Every poem feels alive, and though they're often 'homages' to other writers, and 'after' other writers, the book is crackling throughout with an individual personality." -David Ferry

WALL STREET AND THE RISE OF HITLER

THE ASTONISHING TRUE STORY OF THE AMERICAN FINANCIERS WHO BANKROLLED THE NAZIS

CLAIRVIEW BOOKS 'The contribution made by American capitalism to German war preparations can only be described as phenomenal. It was certainly crucial to German military capabilities... Not only was an influential sector of American business aware of the nature of Naziism, but for its own purposes aided Naziism wherever possible (and profitable) - with full knowledge that the probable outcome would be war involving Europe and the United States.' Penetrating a cloak of falsehood, deception and duplicity, Professor Antony C. Sutton reveals one of the most remarkable but unreported facts of the Second World War: that key Wall Street banks and American businesses supported Hitler's rise to power by financing and trading with Nazi Germany. Carefully tracing this closely guarded secret through original documents and eyewitness accounts, Sutton comes to the unsavoury conclusion that the catastrophic Second World War was extremely profitable for a select group of financial insiders. He presents a thoroughly documented account of the role played by J.P. Morgan, T.W. Lamont, the Rockefeller interests, General Electric Company, Standard Oil, National City Bank, Chase and Manhattan banks, Kuhn, Loeb and Company, General Motors, the Ford Motor Company, and scores of others in helping to prepare the bloodiest, most destructive war in history. This classic study, first published in 1976 - the third volume of a trilogy - is reproduced here in its original form. (The other volumes in the series study the 1917 Lenin-Trotsky Revolution in Russia and the 1933 election of Franklin D. Roosevelt in the United States.)

MODELING, IDENTIFICATION AND SIMULATION OF DYNAMICAL SYSTEMS

CRC Press This book gives an in-depth introduction to the areas of modeling, identification, simulation, and optimization. These scientific topics play an increasingly dominant part in many engineering areas such as electrotechnology, mechanical engineering, aerospace, and physics. This book represents a unique and concise treatment of the mutual interactions among these topics. Techniques for solving general nonlinear optimization problems as they arise in identification and many synthesis and design methods are detailed. The main points in deriving mathematical models via prior knowledge concerning the physics describing a system are emphasized. Several chapters discuss the identification of black-box models. Simulation is introduced as a numerical tool for calculating time responses of almost any mathematical model. The last chapter covers optimization, a generally applicable tool for formulating and solving many engineering problems.

THE POLITICS OF EXTERNAL INFLUENCE IN THE DOMINICAN REPUBLIC

Praeger Pub Text **It is to be hoped that this analysis of the Dominican situation by two persons who have given it much attention, . . . will help the understanding of deep problems of the Republic to which the American government may, in its wisdom, address itself. Robert Wesson, Series Editor . . . Wiarda and Kryzanek have written a splended overview that meets a major need in the literature. Recommended for upper-division undergraduate students and general readers. Choice Although not usually considered one of the major players in Weteran hemispheric affairs, the Dominican Republic offers the student and professional interested in Latin America a nearby laboratory in which to study the effects of dictatorship, economic intervention, and revolutionary change. The Dominican Republic is also at the center of North-South, East-West currents swirling through the Caribbean Basin. This comprehensive study interweaves the complex interrelations between the international scene and the internal character and development of Dominican national life.**

WOMEN, AGING, AND AGEISM

Routledge **Here is a unique text that examines the lives of middle-aged and old women. Women, Aging and Ageism, in response to the lack of literature that focuses on aging women, presents timely and definitive research that illustrates the implications of ageism and sexism. This landmark volume challenges powerful myths and dangerous stereotypes and identifies the damaging restrictions that society forces upon aging women. In extending feminist research to middle and old age, the chapters taken together comprise a critique of the conditions of the last third of women's lives. The authors use analytical tools and methodologies developed and modified by feminists to explore questions previously unasked. They focus on issues of deep concern to women at midlife and beyond, including the politics of reproduction, sexuality, social isolation, violence against women, equal opportunity, and the feminization of poverty. Women, Aging and Ageism is available for classroom adoption. Ideal for students and helping professionals working with middle-aged and old women and their families, this book provides models of effective interventions grounded in field research and clinical practice. For all readers concerned about middle-aged and old women and the quality of their lives, Women, Aging and Ageism is a rich resource filled with ideas and information and an affirmative new volume about the limitless possibilities of women's achievement in midlife and old age.**

PIPERIDINE

STRUCTURE, PREPARATION, REACTIVITY, AND SYNTHETIC APPLICATIONS OF PIPERIDINE AND ITS DERIVATIVES

Elsevier Science Limited **Piperidine**, one of the simplest heterocyclic systems, is found in nature as part of several alkaloid compounds. Both natural and especially unnatural piperidine derivatives present interesting pharmacological properties. From a structural viewpoint, the conformation of piperidine has been the subject of one of the fiercest controversies in structural organic chemistry in the last few years. As a result of the combined use of several spectroscopic techniques, the conformational behavior of most types of piperidine-related compounds has been clarified. Some piperidine derivatives, namely, N -acylpiperidine, agr;-cyanopiperidines and piperidones are extremely useful and versatile intermediates in organic synthesis. The present book offers an updated and integrated view of all these topics. The aim of the book is twofold. Firstly, to reveal to the reader the combined use of different spectroscopic data, to facilitate an insight into the structure and conformational properties of any new piperidine derivative. Secondly, to establish a consistent link between conformation and reactivity for a variety of piperidine derivatives. Such a bridge is a key step for stereocontrol when dealing with the application of piperidine derivatives as synthetic intermediates. The book is conceived so that most of the information comes from visual inspection of the very abundant graphic material. An exhaustive subject index of more than 450 entries is also included.

HIERONYMUS BOSCH, GARDEN OF EARTHLY DELIGHTS

Prestel Pub **Hans Belting** avoids interpreting Hieronymus Bosch's triptych, *The Garden of Earthly Delights*, as a heretical masterpiece, a personal examination of the church's dogmas, or as an opulent illustration of the Creation. Instead, he sees the panels as a painted Utopia, reflecting the zeitgeist of the period. He links the work to the humanist theories of Thomas More and Willibald Pirckheimer and examines the question that Bosch posed: "What would the world have been like without the Fall?" In addition, the author determines the secular patron and analyses the intended purpose of the painting.

RICK BARTOW

MY EYE

Hallie Ford Museum of Art **Rick Bartow (b. 1946)** is a Native American artist who lives and works on the Oregon coast, yet has built a remarkable web of connections with other artists and art traditions around the world. The book includes pastel drawings, paintings, and mixed media sculptures that reveal the rich and multiple sources of Bartow's wildly beautiful imagery. Bartow, who is of Yurok heritage, draws on his own Native American mythological traditions, as well as those of Europe, Asia and the South Pacific. Based on extensive

interviews with the artist, the book traces the development of Bartow's vision over the course of his lifetime. Bartow's work can be understood, as he asserts it to be, as part of a continuum of work incorporating animal/human images in the world art history that stretches back to early cave paintings in Europe and rock art in North America, to 16th-century Dutch painter Hieronymus Bosch and contemporary Native American artist Harry Fonseca.
