Theory, Practice, and Community Development

Routledge For many scholars, the study of community and community development is at a crossroads. Previously dynamic theories appear not to have kept pace with the major social changes of our day. Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories. Theory, Practice, and Community Development stretches the traditional boundaries and applications of well-established community development theory, and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development. Expanded from a special issue of the journal Community Development, Theory, Practice, and Community Development collects previously published and widely cited essays, as well as new theoretical and empirical research in community development. Compiled by the editors of Community Development, the essays feature topics as varied as placemaking, democratic theory and rural organizing. Theory, Practice, and Community Development is vital for scholars and practitioners coming to grips with the rapidly changing definition of community.

Differentiation and Articulation in Tertiary Education Systems

A Study of Twelve African Countries

World Bank Publications This title explores an area of tertiary education that is currently understudied; this is the extent and nature of differentiation and articulation in African tertiary education systems. The overall finding is that the binary system is dominant, characterised by universities and polytechnics as distinct types of institutions. Differentiation is clearly evident in Africa. However, though varied in nature and extent, the differentiation is mostly horizontal as opposed to vertical. Articulation, on the other hand, seems to be in its infancy as some universities, in their admission requirements, d.

Understanding and Using Reading Assessment, K-12, 3rd Edition

ASCD Why do we assess reading? What do we assess when we assess reading? How, where, and when do we assess reading? Reading instruction and assessment expert Peter Afflerbach addresses these questions and much more in the 3rd edition of Understanding and Using Reading Assessment, K-12. Using the CURRV model to evaluate reading assessment methods—including reading inventories, teacher questioning, performance assessment, and high-stakes reading tests—Afflerbach considers the consequences and usefulness of each method, the roles and responsibilities of key stakeholders, and the reliability and validity of the assessments. In addition, he examines four important but often overlooked aspects of reading assessment: • Assessment accommodation for English-language learners and students with special needs • Assessment of noncognitive aspects of reading, such as motivation, engagement, self-concept, and self-efficacy • The use of formative and summative assessment • The importance of self-assessment in building reading independence The book provides detailed case studies from all grade levels to illustrate reading assessment done well. It also includes 15 reproducible forms and checklists that teachers and administrators can use to optimize their reading assessment efforts. Students are expected to read increasingly complex texts and to complete increasingly complex reading-related tasks to demonstrate their growth as readers. This book offers teachers and administrators alike a clear path to helping students meet those expectations. This book is a co-publication of ASCD and ILA. New to the 3rd edition: • New chapter "Formative and Summative Assessment" • Three significantly revised chapters—Performance Assessment; Assessment Accommodation for English Learners and Students With Special Needs ("Accommodation and Reading Assessment" in 2nd edition); Assessing "the Other": Important Noncognitive Aspects of Reading • Fifteen reproducible and downloadable forms and checklists
