Reserved for those least trusted by staff, this room was locked from the outside all night long. It was named after Raymond, the room's perennial resident. Raymond's Room makes a compelling case that people with disabilities are still locked away from the rest of society. They may not be housed in rooms like Raymond's, but they are placed in facilities and programs run by a public monopoly unwilling to change. Using research, anecdotes, humor, and engaging stories, DiLeo takes aim at the billion-dollar disability industrial complex that segregates people with significant disabilities from mainstream life. Calling people with disabilities society's hidden citizens, he describes a system that prevents people from working and living in their communities, despite techniques and approaches that can help even those with the most serious challenges work and have a home of their own. For 230 pages, DiLeo describes the downsides to current practices in the field and then offers up proven alternatives to open Raymond's room. **Essentials of Skilled Helping Managing Problems, Developing Opportunities** *Brooks/Cole Publishing Company* [In this book, the author offers an] opportunity development approach. Time-use experts John P. Robinson and Geoffrey Godbey received national attention when their controversial findings were first published in 1997. Now the book is updated, with a new chapter that includes results of the 1995&-1997 data from the Americans' Use of Time Project. &"Time for Life, an outstanding work of scholarship that manages to be highly readable, demands the attention of everyone interested in what&'s happening in today&'s society.&" &—Edward Cornish, *The Futurist* &"Time for Life . . . is excellent fodder for lively classroom discussions, not only about family time use, but about the ontological and epistemological assumptions in the prevailing post-positivist paradigm of family science.&" &—Alan J. Hawkins and Jeffrey Hill, *Journal of Marriage and the Family* &"Regardless of where you stand on this issue, Robinson and Godbey's arguments and data make for very interesting reading and open a cultural window on American society. . . . But none of these approaches has been proven to be more effective than any other, leaving the therapist with an ethical and professional dilemma: how do you advocate and practise one theory with your clients, when a completely different theoretical approach is being successfully practised down the road? In this book Campbell Purton argues that psychotherapy and counselling theories fail to provide adequate justification for their practice. Part 1 highlights the weaknesses and dangers that underlie traditional counselling theories and their derivatives, including psychodynamic, cognitive behavioural, existential and neuroscience approaches. Having unpicked these theories, Part 2 goes on to develop an exciting new way of thinking about therapy that does not rely on theory - one that can be likened to a 'common sense' approach to therapeutic practice. This book poses important questions and offers unique insight for anyone studying or practising in the field of counselling and psychotherapy. **Business Communication: In Person, In Print, Online** *Cengage Learning* BUSINESS COMMUNICATION: IN PERSON, IN PRINT, ONLINE, 9E offers a realistic approach to communication in today's organizations.
