Writing Your Journal Article in Twelve Weeks

A Guide to Academic Publishing Success

SAGE `A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of Writing Your Dissertation in Fifteen Minutes a Day `Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.

Oh No!

Or How My Science Project Destroyed the World

Hyperion After winning the science fair with the giant robot she has built, a little girl realizes that there is a major problem.

Paper Son

The Inspiring Story of Tyrus Wong, Immigrant and Artist

Schwartz & Wade Winner of the American Library Association's 2021 Asian/Pacific American Award for Best Picture Book! An inspiring picture-book biography of animator Tyrus Wong, the Chinese American immigrant responsible for bringing Disney's Bambi to life. Before he became an artist named Tyrus Wong, he was a boy named Wong Geng Yeo. He traveled across a vast ocean from China to America with only a suitcase and a few papers. Not papers for drawing--which he loved to do--but immigration papers to start a new life. Once in America, Tyrus seized every opportunity to make art, eventually enrolling at an art institute in Los Angeles. Working as a janitor at night, his mop twirled like a paintbrush in his hands. Eventually, he was given the opportunity of a lifetime--and using sparse brushstrokes and soft watercolors, Tyrus created the iconic backgrounds of Bambi. Julie Leung and

Chris Sasaki perfectly capture the beautiful life and work of a painter who came to this country with dreams and talent--and who changed the world of animation forever.

Handbook of Children and Prejudice

Integrating Research, Practice, and Policy

Springer This handbook examines the effects and influences on child and youth development of prejudice, discrimination, and inequity as well as other critical contexts, including implicit bias, explicit racism, post immigration processes, social policies, parenting and media influences. It traces the impact of bias and discrimination on children, from infancy through emerging adulthood with implications for later years. The handbook explores ways in which the expanding social, economic, and racial inequities in society are linked to increases in negative outcomes for children through exposure to adverse childhood experiences (ACEs). Chapters examine a range of ACEs - low income, separation/divorce, family substance abuse and mental illness, exposure to neighborhood and/or domestic violence, parental incarceration, immigration and displacement, and parent loss through death. Chapters also discuss discrimination and prejudice within the adverse experiences of African American, Asian American, European American, Latino, Native American, Arab American, and Sikh as well as LGBTQ youth and non-binary children. Additionally, the handbook elevates dynamic aspects of resilience, adjustment, and the daily triumphs of children and youth faced with issues related to prejudice and differential treatment. Topics featured in the Handbook include: The intergenerational transmission of protective parent responses to historical trauma. The emotional impact of the acting-white accusation. DREAMers and their experience growing up undocumented in the USA. Online racial discrimination and its relation to mental health and academic outcomes. Teaching strategies for preventing bigoted behavior in class. Emerging areas such as sociopolitical issues, gender prejudice, and dating violence. The Handbook of Children and Prejudice is a must-have resource for researchers, graduate students, clinicians, therapists, and other professionals in clinical child and school psychology, social work, public health, developmental psychology, pediatrics, family studies, juvenile justice, child and adolescent psychiatry, and educational psychology.

Health Education in Context: An International Perspective on Health Education in Schools and Local Communities

Springer Science & Business Media This book presents an international perspective on health education and specifically the influence that context has on this aspect of education. The focus includes both formal and non-formal health education and the factors that impact upon its effectiveness, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). An important feature of the book is that it draws upon the experiences and research of local experts, representing the perspectives of an extremely diverse cohort across the world (22 countries and 2 regions in total). The book addresses topics such as: the development and implementation of health education in different countries; the influence of political, cultural, societal or religious mores; governmental or ministerial drives; economic or other pressures driving curriculum reform; and the influence of external assessment regimes on health education. By embedding discussions of health education in local contexts and representing a diversity of perspectives on this important topic this book highlights both barriers and enablers to improving health education across the globe.

EBOOK: Improving Teaching And Learning In Physical Education

McGraw-Hill Education (UK) "The text is a wonderful reflective approach for physical education trainees in the areas of planning, instruction, management, assessment, and feedback. The content is aligned with current international research and UK thinking for the national curriculum. It also promotes highly accepted pedagogical practices through the training scenarios and reader questions in each chapter to assist trainee comprehension. Moreover, it is pertinent that the text focuses on teacher improvement so as to engage student learning progression with an inclusive philosophy. Web prompts, technology learning aid suggestions, and teacher self-observation notes are helpful professional preparation modes. I highly recommend the text for physical education trainee curriculum/pedagogy programs and also existing practitioner reflection." Allan Sander, University of North Florida Coordinator of Physical Education, United States "Improving Teaching and Learning in Physical Education is a very useful text for initial teacher trainers and their trainees alike. It deals with key issues facing today's professional, is well set out making it easy to follow and as a result a useful resource for ITT. I particularly like the way it refers to the QTS standards highlighting each topics relevance in gaining qualified teachers status. But the highlight for me is the way the author's relate the topic to possible interview questions that trainees could feasibly expect to encounter when applying for their first post." Julie Armstrong, PGCE PE Course Leader, Durham University "The main strength of the book is that it is an easy to read, practical text that relates direct to classroom practice. The excerpts from practising physical education teachers at the beginning of each chapter provide a useful introduction to the theme that is to be explored. There are links to the National Curriculum and other current strategies, which supports the strong focus on teaching and learning in current physical education climate that is evident throughout the book. The format of the book with opportunities for reflection, case studies, clear links to practice, exemplar lesson plans and signposted further readings makes the book suitable for anyone training as a secondary school physical education teacher." Paul Carney, Programme Director BA/BSc Physical Education and Sport & Exercise Science Canterbury Christ Church University "The authors are to be congratulated on achieving a consistency of style, content and rigour across the chapters with a number of contributors. Their reward is a book that will be extremely helpful for use by trainee teachers in their journey towards qualified teacher status and entry to the teaching

profession.” Mick Abrahams, afPE Lead Regional Physical Education Subject Adviser Do you want to know more about the key aspects of teaching PE? Would you like help in planning effective PE lessons? Would you like to begin to develop your own personal teaching philosophy? Then this is the essential guide for you! This book will support you in your initial teacher training programme and beyond, taking you through the wide range of issues that you need to consider in order to become a successful teacher and develop successful learners. Each chapter looks at important aspects of PE teaching and relates it directly to the PE lesson and how pupils learn. It covers key areas, including: Planning Assessment Lesson organization Managing pupil behaviour Health and safety ICT There is a sample lesson plan at the end of every chapter which shows the reader how to incorporate aspects of the PE National Curriculum into each lesson. Reflection tasks are included throughout to encourage trainee teachers to critically analyze their own practice. This is supported with real life examples of teacher and trainee experiences of teaching PE in secondary schools. The book also provides guidance to the trainee teacher applying for their first post in a school. The authors offer common interview questions to help the reader formulate and justify a personal philosophy of teaching PE which will be vital to their personal and professional development, as well as the interview process itself. This book is essential reading for all trainee and practising secondary school PE teachers.

Critical Power Tools

Technical Communication and Cultural Studies

SUNY Press Winner of the 2007 National Council of Teachers of English (NCTE) Award for Best Collection of Essays on Technical and Scientific Communication The first book to focus on the intersection of cultural studies and technical communication, *Critical Power Tools* draws on various traditions of cultural studies to develop new or expanded theoretical, methodological, and pedagogical approaches to technical communication. Offered as a sourcebook for the field, the book is organized into three parts. The first section, emphasizing theory building, reconceptualizes key concepts or practices, such as usability, through a cultural studies lens. The second section illustrates alternative research methods through several case studies. The third section offers critical and productive pedagogical approaches, including specific assignments, applicable to both undergraduate and graduate courses.

Exploring Science International Year 7 Student Book

Subject: science; biology, chemistry, and physics Level: Key Stage 3 (age 11-14) Exciting, real-world 11-14 science that builds a base for International GCSEs. Pearson's popular 11-14 Exploring Science course - loved by teachers for its exciting, real-world science - inspires the next generation of scientists. With brand-new content, this 2019 International edition builds a base for progression to International GCSE Sciences and fully covers the content of the 13+ Common Entrance Exam. Exciting, real-world science that inspires the next generation of scientists. Explore real-life science that learners can relate to, with stunning videos and photographs. Provides content for a broad and balanced science curriculum, while building the skills needed for International GCSE sciences and the 13+ Common Entrance Exam. Choose from two Student Book course options to match the way your school teaches 11-14 science. The Student Books are arranged by year (Year 7, 8 and 9) or by science (biology, chemistry, physics). This Student Book contains all Year 7 biology, chemistry and physics content. Learn more about this series, and access free samples, on our website: www.pearsonschools.co.uk/ExploringScienceInternational.

Regression Modeling Strategies

With Applications to Linear Models, Logistic Regression, and Survival Analysis

Springer Science & Business Media Many texts are excellent sources of knowledge about individual statistical tools, but the art of data analysis is about choosing and using multiple tools. Instead of presenting isolated techniques, this text emphasizes problem solving strategies that address the many issues arising when developing multivariable models using real data and not standard textbook examples. It includes imputation methods for dealing with missing data effectively, methods for dealing with nonlinear relationships and for making the estimation of transformations a formal part of the modeling process, methods for dealing with "too many variables to analyze and not enough observations," and powerful model validation techniques based on the bootstrap. This text realistically deals with model uncertainty and its effects on inference to achieve "safe data mining".

Heinemann International Incorporated

Slab City

"Dispatches from the Last Free Place"

MIT Press An architect and a photographer explore a community of squatters, artists, snowbirds, migrants, and survivalists inhabiting a former military base in the California desert. Under the unforgiving sun of southern California's Colorado Desert lies Slab City, a community of squatters, artists, snowbirds, migrants, survivalists, and homeless people. Called by some "the last free place" and by others "an enclave of anarchy," Slab City is also the end of the road for many. Without official electricity, running water, sewers, or trash pickup, Slab City dwellers also live without law enforcement, taxation, or administration. Built on the concrete slabs of Camp Dunlap, an abandoned Marine training base, the settlement maintains its off-grid aspirations within the site's residual military perimeters and gridded street layout; off-grid is really in-grid. In this book, architect Charlie Hailey and photographer Donovan Wylie explore the contradictions of Slab City. In a series of insightful texts and striking color photographs, Hailey and Wylie capture the texture of life in Slab City. They show us Slab Mart, a conflation of rubbish heap and recycling center; signs that declare Welcome to Slab City, Tai Chi on the Slabs Every morning, and Don't fuck around; RVs in conditions ranging from luxuriously roadworthy to immobile; shelters cloaked in pallets and palm fronds; and the alarmingly opaque water of the hot springs. At Camp Dunlap in the 1940s, Marines learned how to fight a war. In Slab City, civilians resort to their own wartime survival tactics. Is the current encampment an outpost of freedom, a new "city on a hill" built by the self-chosen, an inversion of Manifest Destiny, or is it a last vestige of freedom, tended by society's dispossessed? Officially, it is a town that doesn't exist. Research for this project was supported by the Graham Foundation for Advanced Studies in the Fine Arts.

Building Nazi Germany

Place, Space, Architecture, and Ideology

Rowman & Littlefield This richly illustrated book details the wide-ranging construction and urban planning projects launched across Germany after the Nazi Party seized power. The authors show that it was an intentional program to thoroughly reorganize the country's economic, cultural, and political landscapes in order to create a dramatically new Germany, saturated with Nazi ideology.

Ride Utah!

With 84,000 square miles of scenic wonder-encompassing the grandeur and majesty of alpine mountain ranges to the rugged splendor of the colorful southwest desert-Utah is certainly one of the greatest motorcycle touring destinations in the world. Home to five national parks, seven national monuments and forty-three state parks, an epic adventure awaits riders in this biker's paradise. Dave Magdiel brings his years of experience touring the American West and his knowledge gained exploring Utah as few others have, to create a book for the seasoned rider or the touring novice alike. In this second edition, he will guide you through three distinct geographic regions of the state, highlighting the history, legend and geology you will encounter, with a bit of humor thrown in for good measure. A fourth section offers alternatives to freeway travel when transiting the state. Extensive appendices provide reference information on motorcycles, clubs and tourism. Adding brief articles with tips on weather, equipment and safety, Dave gives you what every rider needs-a little knowledge about what to expect and what to look for-to make the ride more fun and enjoyable. Ride Utah! brings the road to life and will make you feel a part of the ride before you ever throw a leg over the saddle. It's the perfect saddlebag companion for anyone serious about experiencing Utah. Enjoy the ride!

Couples That Work

How Dual-Career Couples Can Thrive in Love and Work

Harvard Business Press Finding fulfillment in both love and work isn't easy--but it's possible. The majority of couples today are dual-career couples. As anyone who's part of such a relationship knows, this presents big challenges: trying to raise kids and achieve career goals while caring for and supporting your partner can seem impossible. Yet most advice for dual-career couples fails, framing the challenges as a zero-sum game in which one partner's gain is the other's loss and solutions feel like sacrifices or unsatisfactory trade-offs. This book is different. In *Couples That Work*, INSEAD professor Jennifer Petriglieri rejects conventional, one-size-fits-all solutions and instead focuses on how dual-career couples can tackle and resolve the challenges they face throughout their lives--together. She identifies three key phases of exploration and personal growth in every couple's work-life journey, showing how partners must navigate these together to strengthen their bond. Each phase is crystallized with a question: How can we make this work? The first phase focuses on the logistics of combining two busy lives and often involves the demands of young children. What do we really want? In the second phase, couples learn to navigate their midlife crises in ways that allow each partner to continue to feel happy and fulfilled. Who are we now? With careers winding down and kids grown up, this last phase offers new freedoms--and uncertainties. Based on a five-year research project, the book includes interviews with couples from over thirty countries--from executives to entrepreneurs and from twentysomething newlyweds to dual-career grandparents. Filled with vivid real-life stories, keen insights, and engaging exercises, *Couples That Work* will help couples develop their own unique answers to that most pressing question: How can we successfully combine love and work?

Beyond Scarcity

Water Security in the Middle East and North Africa

World Bank Publications Water has always been a source of risks and opportunities in the Middle East and North Africa. Yet rapidly changing socioeconomic, political, and environmental conditions make water security a different, and more urgent, challenge than ever before. This report shows that achieving water security means much more than coping with water scarcity. It means managing water resources in a sustainable, efficient, and equitable way. It also involves delivering water services reliably and affordably, to reinforce relationships between service providers and water users and contribute to a renewed social contract. Water security also entails mitigating water-related risks such as floods and droughts. Water security is an urgent target, but it is also a target within reach. A host of potential solutions to the region's water management challenges exist. To make these solutions work, clear incentives are needed to change the way water is managed, conserved, and allocated. To make these solutions work, countries in the region will also need to better engage water users, civil society, and youth. The failure of policies to address water challenges can have severe impacts on people's well-being and political stability. The strategic question for the region is whether countries will act with foresight and resolve to strengthen water security, or whether they will wait to react to the inevitable disruptions of water crises.

Tolley's Risk Assessment Workbook Series: Utilities

*Routledge Risk assessment is the key to successful management of health and safety at work. Risk assessments are carried out in order to quantify and evaluate the significance of workplace hazards so that appropriate control measures can be put in place. Usually, a written record of the assessment is required, detailing the following information: * The hazards - and how much risk is associated. * The risk - with appropriate control measures. * Deadlines - to follow-up the risk assessment to ensure the risk is managed. Failure to carry out risk assessments - punishable by law - is often due to lack of a suitable risk assessment system. Tolley's Risk Assessment Workbook - Utilities provides that system, both in the form of key background information on how to carry out a risk assessment - understanding relevant legislation and regulations - but most importantly by providing: * Checklists - highlighting key industry-specific hazards and control measures. * Questionnaires - highlighting key questions the risk assessor should ask when analysing the risk posed by the hazard. * Action Plans - to ensure the risk assessment is followed up and completed. The Workbook offers a practical risk assessment system: it shows you how to comply with the law and gives you the foundations of a logical procedure that can be understood easily, put into placed quickly where necessary and adapted to your organisation's needs. Tolley's Risk Assessment Workbooks is a series of practical Workbooks providing you with all the information you need to conduct risk assessments in industry-specific areas including: Manufacturing, Retail, Leisure, Education, Offices, and Construction. A special Risk Assessment Workbook on Stress has also been developed in order to facilitate management of this issue which is of key concern to all organisations.*

Moonshot

The Flight of Apollo 11

Simon and Schuster "An extraordinary delight for a reader of any age." —The New York Times Book Review Brian Floca explores Apollo 11's famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Michael Rosen's Sad Book

Walker We all have 'sad stuff' to deal with in life. What makes Michael Rosen most sad is thinking about his son, Eddie, who died. In this book he writes about his sadness, how it affects him, and some of the things he does to try to cope with it.

The Soul of America

The Battle for Our Better Angels

Random House Trade Paperbacks #1 NEW YORK TIMES BESTSELLER • Pulitzer Prize-winning author Jon Meacham helps us understand the present moment in American politics and life by looking back at critical times in our history when hope overcame division and fear. ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • The Christian Science Monitor • Southern Living Our current climate of partisan fury is not new, and in The Soul of America Meacham shows us how what Abraham Lincoln called the "better angels of our nature" have repeatedly won the day. Painting surprising portraits of Lincoln and other presidents, including Ulysses S. Grant, Theodore Roosevelt, Woodrow Wilson, Franklin D. Roosevelt, Harry S. Truman, Dwight Eisenhower, and Lyndon B. Johnson, and illuminating the courage of such influential citizen activists as Martin Luther King, Jr., early suffragettes Alice Paul and Carrie Chapman Catt, civil rights pioneers Rosa Parks and John Lewis, First Lady Eleanor Roosevelt, and Army-McCarthy hearings lawyer Joseph N. Welch, Meacham brings vividly to life turning points in American history. He writes about the Civil War, Reconstruction, and the birth of the Lost Cause; the backlash against immigrants in the First World War and the resurgence of the Ku Klux Klan in the 1920s; the fight for women's rights; the demagoguery of Huey Long and Father Coughlin and the isolationist work of America First in the years before World War II; the anti-Communist witch-hunts led by Senator Joseph McCarthy; and Lyndon Johnson's crusade against Jim Crow. Each of these dramatic hours in our national life have been shaped by the contest to lead the country to look forward rather than back, to assert hope over fear—a struggle that continues even now. While the American story has not always—or even often—been heroic, we have been sustained by a belief in progress even in the gloomiest of times. In this inspiring book, Meacham reassures us, "The good news is that we have come through such darkness before"—as, time and again, Lincoln's better angels have found a way to prevail. Praise for The Soul of America "Brilliant, fascinating, timely . . . With compelling narratives of past eras of strife and disenchantment, Meacham offers wisdom for our own time."—Walter Isaacson "Gripping and inspiring, The Soul of America is Jon Meacham's declaration of his faith in America."—Newsday "Meacham gives readers a long-term perspective on American history and a reason to believe the soul of America is ultimately one of kindness and caring, not rancor and paranoia."—USA Today

Design/Build with Jersey Devil

A Handbook for Education and Practice

Chronicle Books Steve Badanes, Jim Adamson, and John Ringel believe an architect's job does not stop at designing a building, but that it extends to constructing it as well. Now working into their fifth decade, Jersey Devil, the loose-knit group they founded in 1972, bands together under this design/build ethos that an architect's place is just as much on the job site as it is at the drawing board. The trio pioneered design/build practice and their influence has spawned more than one hundred design/build programs. Jersey Devil's process and expertise are unpacked in this Architecture Brief, providing students and teachers with a toolkit for design/build education. Through stories, didactic commentary, and sample exercises, the Design/Build complements nuts-and-bolts content with Jersey Devil's philosophy and perspective, allowing the book to impart practical instruction while acting as a valuable guide for navigating the elusive challenges of design/build. Themes touch on socially responsible architecture, intuition and intentionality, detailing and fostering craftsmanship, group work and collaboration, off-the-shelf components and nonstandard applications, educational reform, ethos and risk, good life and play, the politics of building, and university-community relations.

Data Collection and Analysis

SAGE In simple and non-technical terms, this text illustrates a wide range of techniques and approaches used in social research projects.
