Pearson Higher Ed This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Until now, interior design education has focused on overly complex software programs such as AutoCAD—the equivalent of hitting a fly with a sledgehammer. This breakthrough text helps create and present designs using free, easy-to-learn software: Google SketchUp. Created specifically for college-level courses in Interior Design, CONCEPTUALIZE, CREATE, COMMUNICATE: DESIGNING LIVING SPACES WITH GOOGLE SKETCHUP covers all of the ways SketchUp can be used for interior design and decorating. Step-by-step, illustrated projects walk readers through the design process, including modeling an empty room, finding or creating furniture and accessories, using color and materials, and presenting designs to clients.

RESIDENTIAL DESIGN USING AUTODESK REVIT ARCHITECTURE 2012

SDC Publications Residential Design Using Revit Architecture 2012 is designed for the architectural student new to Revit Architecture 2012. This text takes a project based approach to learning Revit Architecture in which the student develops a single family residence all the way to photo-realistic renderings like the one on the cover. Each book comes with a DVD containing numerous video presentations in which the author shows and explains the many tools and techniques used in Revit Architecture 2012. This book starts with an optional basic introduction to hand sketching techniques and concepts intended to increase your ability to sketch design ideas by hand and to think three-dimensionally. The lessons then begin with an introduction to Revit Architecture 2012. The first four chapters are intended to get the reader familiar with the user interface and many of the common menus and tools. Throughout the rest of the book a residential building is created and the many tools and features of Revit Architecture 2012 are covered in greater detail. Using step-by-step tutorial lessons, the residential project is followed through to create elevations, sections, floor plans, renderings, construction sets, etc.
