EDUCATIONAL ASSESSMENT IN A TIME OF REFORM

STANDARDS AND STANDARD SETTING FOR EXCELLENCE IN EDUCATION

Routledge Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for

future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!

Cengage Learning Raise the academic bar for your students and watch their confidence and success skills increase. **STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, SECOND EDITION** provides an accessible and relevant way for students to move beyond opinions and advice about how to succeed in college by offering an integrated approach of research-backed student success practices paired with student success research studies. Students learn how to put skills for success into practice as they strive to accomplish their academic goals. With an overall theme of reading, critical thinking, and information literacy skills, the text helps students feel comfortable with the structure of research study articles, making it more likely that they will successfully use these higher level sources earlier in their academic careers. By increasing academic rigor, **STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, SECOND EDITION** builds research-based knowledge about what study skills work; teaches students how to engage with scholarly sources; provides opportunities for students to actively read, critically think, and enhance information literacy skills; and supports students to increase their self-efficacy and motivation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

DOING RESEARCH TO IMPROVE TEACHING AND LEARNING

A GUIDE FOR COLLEGE AND UNIVERSITY FACULTY

Routledge Given the increased accountability at the college and university level, one of the most promising ways for faculty at institutions of higher education to improve their teaching is to capitalize upon their skills as researchers. This book is a step-by-step guide for doing research to inform and improve teaching and learning. With background and instruction about how to engage in these methodologies—including qualitative, quantitative, and mixed methods—**Doing Research to Improve Teaching and Learning** provides examples across disciplines of how to use one's research skills to improve teaching. This valuable resource equips faculty with the skills to collect and use different types of research evidence to improve teaching and learning in any college and university classroom. Special Features: Chapter openers highlight the questions and issues that will be addressed in each chapter. Recurring text boxes provide authentic examples from actual research studies, student work, and instructor reflections. Coverage of challenges, key successes, and lessons learned from classroom research presents a nuanced and complete understanding of the process.

TEACHING MATHEMATICAL MODELLING: CONNECTING TO RESEARCH AND PRACTICE

Springer Science & Business Media This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives. There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice. The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever-increasing usage of mathematics in business, the environment, industry and everyday life. The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics. The book will be of interest to teachers, practitioners and researchers in universities, polytechnics, teacher education, curriculum and policy.

LEADERSHIP EDUCATION

A SOURCE BOOK OF COURSES AND PROGRAMS

This sourcebook contains descriptions of original leadership course syllabi and programs for use by educators, student activity directors, and others designing and delivering leadership-development courses and programs. To be selected for this sourcebook, programs must focus on leadership; contain details about curriculum objectives, format, outline, learning modules, projects, activities, and evaluation; include innovative or unique content, method of delivery, or audience; and have been included in a previous edition. The descriptions are divided into five primary sections: degree programs (graduate and undergraduate), academic sources (from high school to graduate level), cocurricular programs, professional programs, and community programs. Also included are a bibliography of reading material used in the courses and programs, two essays describing the design of new campus programs, and an index for references to institutions, course topics, teaching methods, and leadership skills and styles. (JMD).
