Taxes suck! They suck so bad that they might as well be called "tasses" because they truly are a pain...of a task...to keep track of, prepare, calculate, and file every year. What about hiring an accountant to do the work? Wait, did you forget about needing to stash a couple hundred bucks or more depending on how complicated your tax situation is to pay a professional, which you don't have or don't want to depart with? Simply put - we all hate doing taxes and, even more, giving up a portion of our hard-earned money to the Taxman. We dread them. We can't avoid them. The penalties are there for not complying. Psst...now let us let you in on a little secret. Tax prep isn't as perplexing as you may think. Sure, tax returns are designed with all sorts of convoluted technical wordings and footnotes to throw us, taxpayers, off from easily gaming the taxation system that funds our government and from us easily gaining the optimal tax efficiency for saving on our tax bill, because Uncle Sam does want to squeeze out every last cent. The fact of the matter is, anybody can file taxes - and for free - without ever needing to pay for an accountant or throw money at the latest popular tax software. If you have never done your own taxes before, you're in luck. "Tax Preparation for Beginners" is precisely what the greedy Taxman hates and what you need to get you up to speed and empower you to feel confident and competent to file taxes for the first time, all by yourself. "Tax Preparation for Beginners" will guide you through: - The personal information and documentation needed upon filing your tax return - The good old-fashioned doing taxes by hand-on-paper for seniors or technophobes - The eFile way of submitting taxes directly to the IRS for free with no muss, no fuss - The convenient software to handle complex tax situations, expenses, and deductions - The safely-guarded methods nobody uses, except the rich, to pay as little to no taxes ...on top of everything else that beginners need to know. You will not only get a guiding hand on preparing taxes - but also the secret to NOT paying taxes...legally...like how the wealthy do. Alright, that might be too far of a stretch - so at the very least, lower your taxes dramatically below the standard limitation via "tax hack strategies," which even an accountant probably doesn't disclose upfront unless you already know how to exploit those things and bring them up. Also, shall we dare say that you might find doing taxes fun? We know! That's likely blasphemy to associate "tax" with "fun." Yet, there's no denying that getting bigger than anticipated "tax refund" is always "tax fun." Right? Fear no more of the Taxman and taxes, newbie. Now even a high schooler, who knows diddly-squat about finance while still living in their parent's basement, can file taxes on their own after getting their first job and paycheck ever. You'll never have apprehension again but instead - the capability in doing all your taxes from now on. **Fundamentals of Corporate Finance** John Wiley & Sons Fundamentals of Corporate Finance, 2nd Edition offers an innovative integration of conceptual understanding and problem-solving ... of intuition and decision-making ... of the authors' industry and classroom/research experience ... with current real-world examples and online practice. Authors Robert Parrino, David Kidwell, and Thomas Bates believe that students who understand the intuition underlying the basic concepts of finance are better able to develop the critical judgments necessary to apply financial tools in real decision-making situations. Their text develops intuitive thinking while simultaneously helping students develop problem solving and computational skills. It then shows students how to apply intuition and analytical skills to decision making while integrating it all with valuation and building shareholder value. **Intermediate Accounting, Binder Ready Version** John Wiley & Sons This text is an unbound, binder-ready edition. Kieso, Weygandt, and Warfield's Intermediate Accounting, Sixteenth Edition continues to set the standard for students and professionals in the field. The 16th edition builds on this legacy through new, innovative student-focused learning. Kieso maintains the qualities for which the text is globally recognized, including its reputation for accuracy, comprehensiveness, accessibility, and quality problem material that best prepares students for success on the CPA exam and accounting careers. The 16th edition offers the most up-to-date coverage of US GAAP & IFRS in a format suited to the

complex challenges of teaching intermediate accounting in these changing times. This book has been created to appeal directly to the widest possible market **Ebook: Fundamentals of Corporate Finance** McGraw Hill Ebook: Fundamentals of Corporate Finance **Income Tax Law Training for Revenue Agents: Corporations Financing Africa's Cities The Imperative of Local Investment** World Bank Publications This volume addresses the issues of financing urban growth of the African continent -- which has the highest urban growth rate on the planet -- in the next decades. Considerable investment will be needed to sustain this level of growth and to clear up accumulated backlogs. At the same time, decentralization has resulted in increased responsibilities for local government; but in most cases, institutional reforms were carried out without the transfer of a sufficient level of resources, and local capacities in governance and project management are weak. Which mechanisms will finance these extensive needs, and how will African local governments meet these needs? Specifics on how to finance African cities have not been studied. The actual scale of this market has not been fully grasped. A systemic approach to this market is difficult because of its diversity (country size; institutional context; characteristics of urban network; availability of capital market, currency, etc.) and a lack of data. Donors' assistance methods in the sector are disparate, marked by disputes between different schools of thought; special-purpose vehicles created by donors operate according to a variety of methods and with wide-ranging and sparsely disseminated results. What is the best way to transform these systems, often antiquated in many respects, into modern financing systems that facilitate access to domestic markets, mobilize local savings and reinforce local government autonomy? There is no single answer to this question in regard to such a variety of institutional and economic contexts. The main objective of the study is to clarify the debates and to enlighten the choices of African decision-makers at local and national level.
