Race, Equity, and Education

Sixty Years from Brown

Springer This powerful and timely analysis takes stock of race and education sixty years after the historic **Brown vs. Board of Education** decision. This volume examines education as one of the most visible markers for racial disparities in the US as well as one of its most visible frontiers for racial justice. Featuring original research, educators' insights, and perspectives from communities of color, it documents the complex impact of social/educational policy on social progress. Chapters on charter schools, curriculum content, performance measurement, and disproportionalities in special education referrals shed light on entrenched inequities that must be confronted. The book also makes it clear that leveling the playing field calls for not only better schools, but also addressing pervasive social problems such as poverty and housing segregation. Included in the coverage: **School Policy is Housing Policy: Deconcentrating Disadvantage to Address the Achievement Gap. Charter Schooling, Race Politics, and an Appeal to History. The Data Quality Movement for the Asian American and Pacific Islander community: an unresolved civil rights issue. Critical Ethnic Studies in High School Classrooms: Academic Achievement via Social Action. Mexican American Educational Stagnation: The Role of Generational Status, Parental Narratives and Educator Mes sages. p/pp Pinpointing crucial issues and opportunities for solutions, Race, Equity, and Education has immediate salience for educators and researchers studying the intersection of race and education.**

The Framework for Teaching Evaluation Instrument, 2013 Edition

The Newest Rubric Enhancing the Links to the Common Core State Standards, with Clarity of Language for Ease of Use and Scoring

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Reading Fluency

MDPI Reading fluency has been identified as a key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction.

Your Living Trust and Estate Plan 2012-2013

How to Maximize Your Family's Assets and Protect Your Loved Ones

Simon and Schuster This revised fourth edition from estate-planning expert Harvey J. Platt details the most up-to-date strategies for using a living trust to create a flexible estate plan. With explanations of the latest tax laws, including the new Tax Relief Act, changes to the gift and generation skipping tax laws, and the new unified tax schedule rate. This book maps out the most effective techniques for saving money and property and provides the essential details of successful estate planning. *Your Living Trust and Estate Plan 2011-2012* covers vital subjects not found in other books and discusses the components of and variations in living trusts, how to select beneficiaries, understanding the probate process, contributing to charities, life insurance, retirement benefits, ethical wills, dynasty trusts, postmortem planning, trust decanting, income tax planning, and offshore trusts.

The Central Intelligence Agency and Overhead Reconnaissance

The U-2 and Oxcart Programs, 1954-1974

Simon and Schuster This volume presents the complete CIA document revealing newly declassified information on the U-2 and Oxcart programs—plus new photos and supporting text. *The Central Intelligence Agency and Overhead Reconnaissance 1954-1974* is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs, a new preface by author Gregory W. Pedlow, and a foreword by Chris Pocock.

Meccan Trade and the Rise of Islam

Gorgias Press Patricia Crone reassesses one of the most widely accepted dogmas in contemporary accounts of the beginnings of Islam: the supposition that Mecca was a trading center. In addition, she seeks to elucidate sources on which we should reconstruct our picture of the birth of the new religion in Arabia.

Fundamentals of Environmental Engineering

CRC Press The field of environmental engineering is rapidly emerging into a mainstream engineering discipline. For a long time, environmental engineering has suffered from the lack of a well-defined identity. At times, the problems faced by environmental engineers require knowledge in many engineering fields, including chemical, civil, sanitary, and mechanical engineering. Increased demand for undergraduate training in environmental engineering has led to growth in the number of undergraduate programs offered. Fundamentals of Environmental Engineering provides an introductory approach that focuses on the basics of this growing field. This informative reference provides an introduction to environmental pollutants, basic engineering principles, dimensional analysis, physical chemistry, mass, and energy and component balances. It also explains the applications of these ideas to the understanding of key problems in air, water, and soil pollution.

Buying into the Environment

Experiences, Opportunities and Potential for Eco-procurement

Routledge Green purchasing - or eco-procurement - by local and central governments has long been recommended in documents such as Agenda 21 to be a key - although sometimes supplemental-ingredient in the achievement of more environmentally responsible economies. Certainly, sustainable consumption cannot be considered a realistic goal without the full engagement of public authorities. Many initiatives have been undertaken in OECD countries, most successfully in Japan and Denmark where green public purchasing has been proven to be workable and highly effective, while, in other countries, city municipalities have successfully pioneered the development of sophisticated public environmental purchasing policies. However, for the vast majority of countries and their major cities, the potential for green public purchasing remains woefully untapped. A key question is what would be the environmental impact if the majority of cities in Europe replicated the success stories of those leading the way? Public procurement has, after all, been an important tool in achieving other public policy goals such as defence. Why should it not be used as a tool to defend the environment? The RELIEF project, funded by the EU's "City of Tomorrow and Cultural Heritage" programme was established to answer exactly this question: to define the true potential of eco-procurement and to develop a strategy for change in Europe. Buying into the Environment is the result of the research segment of the project which has now been completed. A further stage-to design a Europe-wide action plan will follow in 2004. The book, organised under the auspices of the International Council on Local Environmental Initiatives (ICLEI) analyses

national approaches already tested, and provides in-depth surveys on the pioneer cities such as Hamburg, Malmo and Zurich. Serious attention is given to city-specific hurdles which have been faced and overcome. The most relevant product groups for eco-procurement such as construction, transport, energy, information technology, furniture and food. are also analysed. Uniquely, the book also provides calculations on the environmental benefits potentially achievable through greener purchasing. Tools were developed and tested by the RELIEF researchers on the environmental assessment of products, public buying power and on evaluations of market conditions in order to provide scenarios for the application of green purchasing at a European level. The conclusions are that there is huge potential for both local and central governments to adapt their behaviour patterns and purchase in a more environmentally responsible way. For example, 18% of the EU's Kyoto Protocol commitment could be achieved if major cities in the European Union purchased green electricity. The results are complemented by new ideas on how best to foster innovation in public contractual arrangements-to encourage the development of products such as super-energy-efficient computers and fuel cells-and how the legal system may require adaptation and reform. The results presented in this book will provide an indispensable resource for municipalities, governments, researchers and business practitioners looking for answers on how public procurement can have a fundamental and manifestly positive effect on the environment.

The Book of the Thousand Nights and a Night

Captain Sir Richard Francis Burton KCMG FRGS (1821-1890) was an English explorer, translator, writer, soldier, orientalist, ethnologist, linguist, poet, hypnotist, fencer and diplomat. He was known for his travels and explorations within Asia and Africa as well as his extraordinary knowledge of languages and cultures. According to one count, he spoke 29 European, Asian, and African languages. He was a captain in the army of the East India Company serving in India. Following this he was engaged by the Royal Geographical Society to explore the east coast of Africa and led an expedition guided by the locals which discovered Lake Tanganyika. His best-known achievements include travelling in disguise to Mecca, making an unexpurgated translation of *The Book of One Thousand Nights and a Night*. Burton was considered a controversial figure in his day; many considered him a hero, others jealous of his achievements called him a scoundrel. Burton remains possibly the greatest explorer ever because of his remarkable research and uncensored documentation of the lifestyles of the various cultures he encountered in his adventures.

Vietnam Studies

U. S. Army Special Forces 1961-1971

As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam. going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is, in fan, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems, successes, and failures of a unique program undertaken by the U.S. Army for the first time in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must take note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare-the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group (Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime.
Francis John Kelly Colonel, Armor 1972

Technics and Civilization

University of Chicago Press *Technics and Civilization* first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters of a century after they were written.”—*Journal of Technology and Culture*

The Book of the Duffs

Black Skin, White Masks

Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

Pathways to the Common Core

Accelerating Achievement

Heinemann Educational Books Lucy Calkins and her colleagues at the Reading and Writing Project have helped thousands of educators design their own pathways to the Common Core. Now, with *Pathways to the Common Core*, they are ready to help you find your way. Designed for teachers, school leaders, and professional learning communities looking to navigate the gap between their current literacy practices and the ideals of the Common Core, *Pathways to the Common Core* will help you: understand what the standards say, suggest, and what they don't say; recognize the guiding principles that underpin the reading and writing standards; identify how the Common Core's infrastructure supports a spiraling K-12 literacy curriculum; and scrutinize the context in which the CCSS were written and are being unrolled. In addition to offering an analytical study of the standards, this guide will also help you and your colleagues implement the standards in ways that lift the level of teaching and learning throughout your school.

Canyons of the Colorado

Cosimo, Inc. Since we left the Colorado Chiquito we have seen no evidences that the tribe of Indians inhabiting the plateaus on either side ever come down to the river; but about eleven o'clock to-day we discover an Indian garden at the foot of the wall on the right, just where a little stream with a narrow flood plain comes down through a side canyon. Along the valley the Indians have planted corn, using for irrigation the water which bursts out in springs at the foot of the cliff. The corn is looking quite well, but it is not sufficiently advanced to give us roasting ears; but there are some nice green squashes. We carry ten or a dozen of these on board our boats and hurriedly leave, not willing to be caught in the robbery, yet excusing ourselves by pleading our great want. -from "August 26" Sometimes published under the name *The Exploration of the Colorado River and Its Canyons*, but more properly known by its original title, *Canyons of the Colorado* is the gripping personal account of the first navigation of the Colorado River, in 1869, by the man who led the journey. American geologist and explorer JOHN WESLEY POWELL (1834-1902), head of the Powell Geographic Expedition and later director of the U.S. Geological Survey, here regales us with the thrilling tale of the ten-man team and its assignment to map the last unmapped regions of the western territories of the United States. The highlight of their three-month trip: the first known river journey through the wildness of the Grand Canyon. This replica of the 1895 edition includes all the original halftone illustrations. A classic of real-life adventure literature, it continues to captivate armchair explorers today.

Unearthly Disclosure

Random House Unearthly Disclosure is a story of alien bases, alien contacts and abductions, genetic mutants, animal mutilations, and government paranoia. Here, Timothy Good, one of the world's most respected authorities on the alien phenomenon, reveals for the first time sensational information provided to him by high-level military and scientific sources, who confirm that aliens have established subterranean and submarine bases on Earth and that extra-terrestrial contact has been made with a select group in the US military and scientific intelligence community. Among numerous revelations in this book are those involving the alien creature photographed by Filiberto Caponi in Italy. The author spent several years investigating this controversial case and commissioned an Expert Witness checked by the Law Society to analyse Caponi's astonishing photographs. Published for the first time, this unique story forms the central section of Unearthly Disclosure.
