It is the first text to draw together the three key elements of secondary sector teaching in relation to media study - the theoretical, the practical and the professional - in order to support media teachers throughout their careers: Section One: Contexts explores the history of, rationale for, and justification of studying the media from 1900 to the present day, and considers the tensions implicit in the subject caused by opposing views of culture. Section Two: Curriculum comprises seven chapters that focus on studying the media from Key Stages 3 and 4 in English, through GCSE and A Level Media Studies. It also explores approaches to teaching the Creative and Media Diploma, media and citizenship, and practical media production. Section Three: Career Development is designed to support those establishing and leading Media Studies departments and those who are charged with the initial preparation and professional development of teachers. Written by experts involved in the teaching, training and examination of Media Studies, this one-stop resource is packed with illustrative case studies and exemplar schemes of work which can be easily adapted for your own needs. Suggested Reading and Recommended Resources sections at the end of each chapter list additional books, films, DVDs, groups, agencies, organisations, contact details, websites and other materials which will support your teaching even further. The Media Teacher's Handbook is an essential guide to the theory, pedagogy, and practice of media education that will enable you to teach your subject expertly and with confidence.*

Contract Law Routledge *This textbook covers the Contract Law option of the new A-level law syllabus, and provides at the same time an ideal introduction for anybody coming to the subject for the first time. The book covers all A-level syllabuses/specification requirements, and is written by the principal examiner in Contract Law for one of the major examination boards. It contains extensive case illustration, and a range of examination related questions and activities. There is a special focus on key skills, and on the new synoptic assessment syllabus requirements. This fully updated fourth edition builds upon the success of the first three editions, with new case law (especially on offer and acceptance, legal intent, terms, exemption clauses and misrepresentation remedies) and coverage of new statute law (especially Unfair Terms in Consumer Contracts Regulations).*

Inclusive Educational Administration A Case Study Approach, Second Edition Waveland Press *Regular and special education administrators regularly encounter problems when attempting to work together to create and maintain successful special education programs. This updated and improved second edition seeks to overcome this obstacle by training readers in shared problem solving. Each chapter focuses on a specific issue including school reform, fiscal and human-resource matters, school governance, identification and placement, conflict resolution, program evaluation, transportation, and discipline followed by real-life case studies and questions designed to encourage inclusive thinking and discussion within a cohort. These real-life case studies are an ideal way to hone problem-solving skills in the safety of the classroom and prepare for real-world situations. The second edition integrates new legislation, such as IDEA 2004 and No Child Left Behind, and discusses contemporary developments including Response to Intervention (RtI). Enhanced graphics and semantic maps effectively highlight key terms and concepts. The authors have added a new section featuring concept maps and key vocabulary terms for each case study. Instructors will appreciate this invaluable tool to facilitate discussion and promote critical thinking about the elements presented in each chapter.*

Machine Learning with Apache Spark Quick Start Guide Uncover patterns, derive actionable insights, and learn from big data using MLlib Packt Publishing Ltd *Combine advanced analytics including Machine Learning, Deep Learning Neural Networks and Natural Language Processing with modern scalable technologies including Apache Spark to derive actionable insights from Big Data in real-time*

Key Features *Make a hands-on start in the fields of Big Data, Distributed Technologies and Machine Learning*

Learn how to design, develop and interpret the results of common Machine Learning algorithms *Uncover hidden patterns in your data in order to derive real actionable insights and business value*

Book Description *Every person and every organization in the world manages data, whether they realize it or not. Data is used to describe the world around us and can be used for almost any purpose, from analyzing consumer habits to fighting disease and serious organized crime. Ultimately, we manage data in order to derive value from it, and many organizations around the world have traditionally invested in technology to help process their data faster and more efficiently. But we now live in an interconnected world driven by mass data creation and consumption where data is no longer rows and columns restricted to a spreadsheet, but an organic and evolving asset in its own right. With this realization comes major challenges for organizations: how do we manage the sheer size of data being created every second (think not only spreadsheets and databases, but also social media posts, images, videos, music, blogs and so on)? And once we can manage all of this data, how do we derive real value from it? The focus of Machine Learning with Apache Spark is to help us answer these questions in a hands-on manner. We introduce the latest scalable technologies to help us manage and process big data. We then introduce advanced analytical algorithms applied to real-world use cases in order to uncover patterns, derive actionable insights, and learn from this big data. What you will learn*

Understand how Spark fits in the context of the big data ecosystem *Understand how to deploy and configure a local development environment using Apache Spark*

Understand how to design supervised and unsupervised learning models *Build models to perform NLP, deep learning, and cognitive services using Spark ML libraries*

Design real-time machine learning pipelines in Apache Spark *Become familiar with advanced techniques for processing a large volume of data by applying machine learning algorithms*

Who this book is for *This book is aimed at Business Analysts, Data Analysts and Data Scientists who wish to make a hands-on start in order to take advantage of modern Big Data technologies combined with Advanced Analytics.*

Vault Guide to Bankruptcy Law Careers Vault Inc. *This Vault career guide provides law students and legal professionals with an inside look at careers in bankruptcy law, including compensation and lifestyle information for the practice area.*
