Routledge Teaching Online: A Practical Guide is a practical, concise guide for educators teaching online. This updated edition has been fully revamped and reflects important changes that have occurred since the second edition's publication. A leader in the online field, this best-selling resource maintains its reader friendly tone and offers exceptional practical advice, new teaching examples, faculty interviews, and an updated resource section. New to this edition: new chapter on how faculty and instructional designers can work collaboratively expanded chapter on Open Educational Resources, copyright, and intellectual property more international relevance, with global examples and interviews with faculty in a wide variety of regions new interactive Companion Website that invites readers to post questions to the author, offers real-life case studies submitted by users, and includes an updated, online version of the resource section. Focusing on the "how" and "whys" of implementation rather than theory, this text is a must-have resource for anyone teaching online or for students enrolled in Distance Learning and Educational Technology Masters Programs.

AMERICA'S LAB REPORT

INVESTIGATIONS IN HIGH SCHOOL SCIENCE

National Academies Press Laboratory experiences as a part of most U.S. high

school science curricula have been taken for granted for decades, but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U.S. high schools: What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all students have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U.S. education system and student outcomes, no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience, looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers, and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished.

MOODLE 3 ADMINISTRATION

Packt Publishing Ltd **An administrator's guide to configuring, securing, customizing, and extending Moodle** About This Book Learn how to plan, install, optimize, customize, and configure Moodle Guarantee a cutting-edge learning experience in a secure and customizable environment while optimizing your day-to-day workload A one-stop guide with a problem-solution approach and a wide range of real-world examples Who This Book Is For If you are a technician, systems administrator, or part of academic staff, this is the book for you. This book is ideal for anyone who has to administer a Moodle system. Whether you are dealing with a small-scale local Moodle system or a large-scale multi-site Virtual Learning Environment, this book will assist you with any administrative task. Some basic Moodle knowledge is helpful, but not essential. What You Will Learn Install and update Moodle on multiple platforms manually and via CLI and GIT Manage courses and categories, users and cohorts, as well as roles Get Moodle hooked up to repositories, portfolios, and open badges Configure Moodle for mobile usage, accessibility, localization, communication, and collaboration Guarantee backups, security and privacy, and achieve maximum performance via the Moodle Universal Cache and the new cron system Configure the Moodle events system to generate comprehensive reports, statistics, and learning analytics Network Moodle with Mahara and extend it with third-party add-ons and via LTI Customize Moodle web services to enable mobile learning and integration with other IT systems In Detail Moodle is the de facto standard for open source learning platforms.

However, setting up and managing a learning environment can be a complex task since it covers a wide range of technical, organizational, and pedagogical topics. This ranges from basic user and course management, to configuring plugins and design elements, all the way to system settings, performance optimization, events frameworks, and so on. This book concentrates on basic tasks such as how to set up and configure Moodle and how to perform day-to-day administration activities, and progresses on to more advanced topics that show you how to customize and extend Moodle, manage courses, cohorts, and users, and how to work with roles and capabilities. You'll learn to configure Moodle plugins and ensure your VLE conforms to pedagogical and technical requirements in your organization. You'll then learn how to integrate the VLE via web services and network it with other sites, including Mahara, and extend your system via plugins and LTI. By the end of this book, you will be able to set up an efficient, fully fledged, and secure Moodle system. Style and approach The book takes a problem-solution approach to fall in line with your day-to-day operations. This is a one-stop reference for any task you will ever come across when administering a Moodle site of any shape and size.

DNA SCIENCE

A FIRST COURSE

CSHL Press This is the second edition of a highly successful textbook (over 50,000 copies sold) in which a highly illustrated, narrative text is combined with easy-to-use thoroughly reliable laboratory protocols. It contains a fully up-to-date collection of 12 rigorously tested and reliable lab experiments in molecular biology, developed at the internationally renowned Dolan DNA Learning Center of Cold Spring Harbor Laboratory, which culminate in the construction and cloning of a recombinant DNA molecule. Proven through more than 10 years of teaching at research and nonresearch colleges and universities, junior colleges, community colleges, and advanced biology programs in high school, this book has been successfully integrated into introductory biology, general biology, genetics, microbiology, cell biology, molecular genetics, and molecular biology courses. The first eight chapters have been completely revised, extensively rewritten, and updated. The new coverage extends to the completion of the draft sequence of the human genome and the enormous impact these and other sequence data are having on medicine, research, and our view of human evolution. All sections on the concepts and techniques of molecular biology have been updated to reflect the current state of laboratory research. The laboratory experiments cover basic

techniques of gene isolation and analysis, honed by over 10 years of classroom use to be thoroughly reliable, even in the hands of teachers and students with no prior experience. Extensive prelab notes at the beginning of each experiment explain how to schedule and prepare, while flow charts and icons make the protocols easy to follow. As in the first edition of this book, the laboratory course is completely supported by quality-assured products from the Carolina Biological Supply Company, from bulk reagents, to useable reagent systems, to single-use kits, thus satisfying a broad range of teaching applications.

HAA K?USTEEY?, OUR CULTURE

TLINGIT LIFE STORIES

Ewha Womans University Press **Haa Kusteeyi, Our Culture: Tlingit Life Stories** is an introduction to Tlingit social and political history. Each biography is compelling in its own merit, but when all are taken together, the collection shows patterns of interaction among people and communities of today, and across the generations. By combining historical documents and photographs with accounts gathered from living memory, the book also enables the present, living generations to interact with their past. The book features biographies and life histories of more than 50 men and women, most born between 1880 and 1910, including a special section on the founders of the Alaska Native Brotherhood. Additional lives are described tangentially. Each biography or life history follows a standard format that includes vital statistics, genealogical information, names in Tlingit and English, and major achievements. But each is also unique. Like the lives they describe, all vary in length, detail, and style, depending on authorship and available human and archival resources. To the fullest extent possible oral and written material from the subjects and their families has been incorporated. Some is more anecdotal, some more historical. The appendixes include previously unpublished historical documents and Tlingit texts with facing translations. The lives in this volume show how individual people both shaped and were shaped by their time and place in history.

LIFE'S MATRIX

A BIOGRAPHY OF WATER

Univ of California Press In "Life's Matrix", Philip Ball writes of water's origins, history, and unique physical character. His provocative exploration of water on other planets highlights the possibilities of life beyond Earth. It also examines the grim realities of depletion of natural resources and its effects on the availability of water in the 21st century. Illustrations.

PROSLAVERY

A HISTORY OF THE DEFENSE OF SLAVERY IN AMERICA, 1701-1840

University of Georgia Press Probing at the very core of the American political consciousness from the colonial period through the early republic, this thorough and unprecedented study by Larry E. Tise suggests that American proslavery thought, far from being an invention of the slave-holding South, had its origins in the crucible of conservative New England. Proslavery rhetoric, Tise shows, came late to the South, where the heritage of Jefferson's ideals was strongest and where, as late as the 1830s, most slaveowners would have agreed that slavery was an evil to be removed as soon as possible. When the rhetoric did come, it was often in the portmanteau of ministers who moved south from New England, and it arrived as part of a full-blown ideology. When the South finally did embrace proslavery, the region was placed not at the periphery of American thought but in its mainstream.

THE ALASKA NATIVE READER

HISTORY, CULTURE, POLITICS

Duke University Press Alaska is home to more than two hundred federally recognized tribes. Yet the long histories and diverse cultures of Alaska's first peoples are often ignored, while the stories of Russian fur hunters and American gold miners, of salmon canneries and oil pipelines, are praised. Filled with essays, poems, songs, stories, maps, and visual art, this volume foregrounds the perspectives of Alaska Native people, from a Tlingit photographer to Athabascan and Yup'ik linguists, and from an Alutiiq mask carver to a prominent Native politician and member of Alaska's House of Representatives. The contributors, most of whom are Alaska Natives, include scholars, political leaders, activists, and artists. The majority of the pieces in *The Alaska Native Reader* were written especially for the volume, while several were translated from Native languages. The *Alaska Native Reader* describes indigenous worldviews, languages, arts, and other cultural traditions as well as contemporary efforts to preserve them. Several pieces examine Alaska Natives' experiences of and resistance to Russian and American colonialism; some of these address land claims, self-determination, and sovereignty. Some essays discuss contemporary Alaska Native literature, indigenous philosophical and spiritual tenets, and the ways that Native peoples are represented in the media. Others take up such diverse topics as the use of digital technologies to document Native cultures, planning systems that have enabled indigenous communities to survive in the Arctic for thousands of years, and a project to accurately represent Dena'ina heritage in and around Anchorage. Fourteen of the volume's many illustrations appear in color, including work by the contemporary artists Subhankar Banerjee, Perry Eaton, Erica Lord, and Larry McNeil.

KEN LIBBRECHT'S FIELD GUIDE TO SNOWFLAKES

TEACHING IN THE ONLINE CLASSROOM

SURVIVING AND THRIVING IN THE NEW NORMAL

John Wiley & Sons **A timely guide to online teaching strategies from bestselling author Doug Lemov and the Teach Like a Champion team** School closures in response to the covid-19 coronavirus pandemic resulted in an immediate and universal pivot to online teaching. More than 3.7 million teachers in the U.S. were suddenly asked to teach in an entirely new setting with little preparation and no advance notice. This has caused an unprecedented threat to children's education, giving rise to an urgent need for resources and guidance. The New Normal is a just-in-time response to educators' call for help. Teaching expert Doug Lemov and his colleagues spent weeks studying videos of online teaching and they now provide educators in the midst of this transition with a clear guide to engaging and educating their students online. Although the transition to online education is happening more abruptly than anyone anticipated, technology-supported teaching may be here to stay. This guide explores the challenges involved in online teaching and guides educators and administrators to identify and understand best practices. It is a valuable tool to help you and your students succeed in synchronous and asynchronous settings this school year and beyond. Learn strategies for engaging students more fully online Find new techniques to assess student progress from afar Discover tools for building online classroom culture, combating online distractions, and more Watch videos of teachers building rigor and relationships during online instruction The New Normal features real-world examples you can apply and adapt right away in your own online classroom to allow you to survive and thrive online.

OPENING UP EDUCATION

THE COLLECTIVE ADVANCEMENT OF EDUCATION THROUGH OPEN TECHNOLOGY, OPEN CONTENT, AND OPEN KNOWLEDGE

MIT Press Online version of MIT Press book has brief overview of book's content and provides links to open access PDF version of ebook, as well as an iPaper version and a link to the MIT Press store for buying the print version. In this collection of essays the authors who are leaders in open education, explore the potential of open education to transform the economics and ecology of education. The authors argue that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs.

CURRICULUM LEADERSHIP DEVELOPMENT

A GUIDE FOR ASPIRING SCHOOL LEADERS

Psychology Press Curriculum Leadership Development is an up-to-date, user-friendly textbook offering unique approaches to help readers understand the complexity of curriculum leadership. It is grounded in current and relevant theory, research, legislation, and application in the closely related areas of curriculum leadership, development, and scholarship. The text solidifies the concepts of curriculum and leadership in experiential learning contexts, and promotes democratic action and critical thinking. Author Carol A. Mullen uses a descriptive, qualitative approach that integrates case study, data analysis, personal reflection, and lessons learned. Among the most important elements of the book are: *the inclusion of the voice and curricular experiences of the professional student who is a seasoned teacher or beginning administrator; *detailed illustrations of practitioners' experiences as curriculum makers and action researchers; *an articulation of the links among curriculum development, constructivist curricula, and mentoring scaffolds; and *practical exercises to accompany case studies. Graduate and advanced undergraduate students in education will find this textbook of value in their coursework, as will curriculum professionals who teach practicing teachers.

RAPID INSTRUCTIONAL DESIGN

LEARNING ID FAST AND RIGHT

John Wiley & Sons The classic guide to instructional design, fully updated for the new ways we learn *Rapid Instructional Design* is the industry standard guide to creating effective instructional materials, providing no-nonsense practicality rather than theory-driven text. Beginning with a look at what "instructional design" really means, readers are guided step-by-step through the ADDIE model to explore techniques for analysis, design, development, intervention, and evaluation. This new third edition has been updated to cover new applications, technologies, and concepts, and includes many new templates, real-life examples, and additional instructor materials. Instruction delivery has expanded rapidly in the nine years since the second edition's publication, and this update covers all the major advances in the field. The major instructional models are expanded to apply to e-learning, MOOCs, mobile learning, and social network-based learning. Informal learning and communities of practice are examined, as well. Instructional design is the systematic process by which instructional materials are designed, developed, and delivered. Designers must

determine the learner's current state and needs, define the end goals of the instruction, and create an intervention to assist in the transition. This book is a complete guide to the process, helping readers design efficient, effective materials. Learn the ins and outs of the ADDIE model Discover shortcuts for rapid design Design for e-learning, Millennials, and MOOCs Investigate methods for emerging avenues of instruction This book does exactly what a well-designed course should do, providing relevant guidance for anyone who wants to know how to apply good instructional design. Eminently practical and fully up-to-date, Rapid Instructional Design is the one-stop guide to more effective instruction.

AN ADMINISTRATOR'S GUIDE TO ONLINE EDUCATION

IAP An Administrator's Guide to Online Education is an essential resource for the higher education administrator. Unlike most books regarding online education, this book is not about teaching; it is about effectively administrating an online education program. Grounded in existing distance education theory, and drawing from best practices, current research, and an extensive review of current literature, An Administrator's Guide to Online Education systematically identifies and discusses seven key issues that affect the practice of online education today: leadership and strategic planning, policy and operation, faculty, online student services, online

student success, technology and the courseware management system, and finally marketing. Throughout the text, the authors provide case studies, examples, policies, and resources from actual institutions, which further enhance the value of this text. An Administrator's Guide to Online Education, encompasses the issues and provides information on how to accomplish one specific task: successful online education administration.

SUSTAINABLE CERAMICS

A PRACTICAL APPROACH

Bloomsbury Publishing Artists are increasingly interested in producing work that is not only beautifully designed and produced, but is also environmentally friendly and socially responsible. In *Sustainable Ceramics*, pioneer Robert Harrison draws on more than four decades of making, and a wealth of experience shared by other artists to present practical possibilities for ceramic artists. This book covers all the factors to consider when going 'green', from fuels and alternative firing technology to energy-saving methods, sustainable ways to collect and use clay itself, and ways to deal with or recycle waste materials and save water. He suggests simple and achievable methods by which to reduce the carbon footprint of ceramic art, and draws on interviews and examples throughout by practitioners who reclaim, reuse and recycle in their studio or work. *Sustainable Ceramics* is an essential resource for any ceramicist, studio or school looking for ideas on how to reduce the impact of their practice on the environment.
