### Hunting with the Bow & Arrow

BoD - Books on Demand The glory and romance of archery culminated in England before the discovery of America. There, no doubt, the bow was used to its greatest perfection, and it decided the fate of nations. The crossbow and the matchlock had supplanted the longbow when Columbus sailed for the New World. It was, therefore, a distinct surprise to the first explorers of America that the natives used the bow and arrow so effectively. In fact, the sword and the horse, combined with the white man's superlative self-assurance, won the contest over the aborigines more than the primitive blunderbuss of the times. The bow and arrow was still more deadly than the gun. With the gradual extermination of the American Indian, the westward march of civilization, and the improvement in firearms, this contest became more and more unequal, and the bow disappeared from the land. The last primitive Indian archer was

discovered in California in the year 1911.

## The Longbow

Bloomsbury Publishing An iconic medieval missile weapon, the deadly longbow made possible the English victories at Crecy and Poitiers at the height of the Hundred Years' War. The longbow was the weapon at the heart of the English military ascendancy in the century after 1340. Capable of subjecting the enemy to a hail of deadly projectiles, the longbow in the hands of massed archers made possible the extraordinary victories enjoyed by English forces over superior numbers at Crécy and Poitiers, and remained a key battlefield weapon throughout the Wars of the Roses and beyond. It also played a leading role in raiding, siege and naval warfare. Its influence and use spread to the armies of Burgundy, Scotland and other powers, and its reputation as a cost-effective and easily produced weapon led to calls for its widespread adoption among the nascent armies of the American Republic as late as the 1770s.
